SMOKING what's the point?

Someday, you'll be offered a cigarette or be tempted to smoke.

Before you start, think about it: every drag you take screws up your body.

Smoking can cause permanent damage to your body. Once a person starts, it becomes extremely tough to quit. And did we mention all that cash you'll be blowing in the process?

So, if you're tempted to start, ask yourself, "What's the point?"
