

June 5, 2006

Photo by Grant Sewell,
Winner of the Earth Day Photo Contest

The 31st World Environment Day was celebrated on Sunday 5th June 2005. It is the year's most important occasion for focusing worldwide attention on the environment.

World Environment Day was established by the United Nations General Assembly in 1972 to mark the opening of the Stockholm Conference on the Human Environment. Since then, it has been held every year, always on the same date, and with an ever growing list of participating countries.

World Environment Day is a people's event with global participation. It has previously been celebrated in many ways, with people all over the world getting involved in street rallies, bicycle parades, concerts, school activities and tree planting as well as recycling and clean-up campaigns.
