SMOKING
what's the point?

Someday, you'll be offered a cigarette or be tempted to smoke. Before you start, think about it: every drag you take screws up your body.

Smoking can cause permanent damage to your body. Once a person starts, it becomes extremely tough to quit. And did we mention all that cash you'll be blowing in the process?

So, if you're tempted to start, ask yourself, "What's the point?"

The Canadian Champion

"I lost 99 lbs., 120cm and 6 dress sizes"

"I had tried other weight loss programs before - only to put it all back on. After seeing an ad for SureSlim I decided to give it a go. That was almost 11 months ago - I have now lost 99 lbs., 47 inches off my tummy, waist & hips, reached my goal weight of 143 lbs. and started my Lifestyle program. I also love shopping for size 10 or 12 dresses - something I also love shopping for size 10 or 12 dresses - something I thought was impossible a year ago!" Nicole
