

Krantz named honorary chair of hospital campaign

Mayor Gord Krantz has been given another important title.

The local politician was named this week as the honorary chair of the Milton District Hospital Foundation's (MDHF) 'Our Community' campaign, with a goal of bringing a CT scanner to the local hospital.

Krantz said he's "thrilled" to be appointed to the position in a campaign that will benefit local residents.

"Milton District Hospital (MDH) already provides excellent health care to the Milton community and the addition of a CT scanner will help to enhance the quality of those services," he remarked.

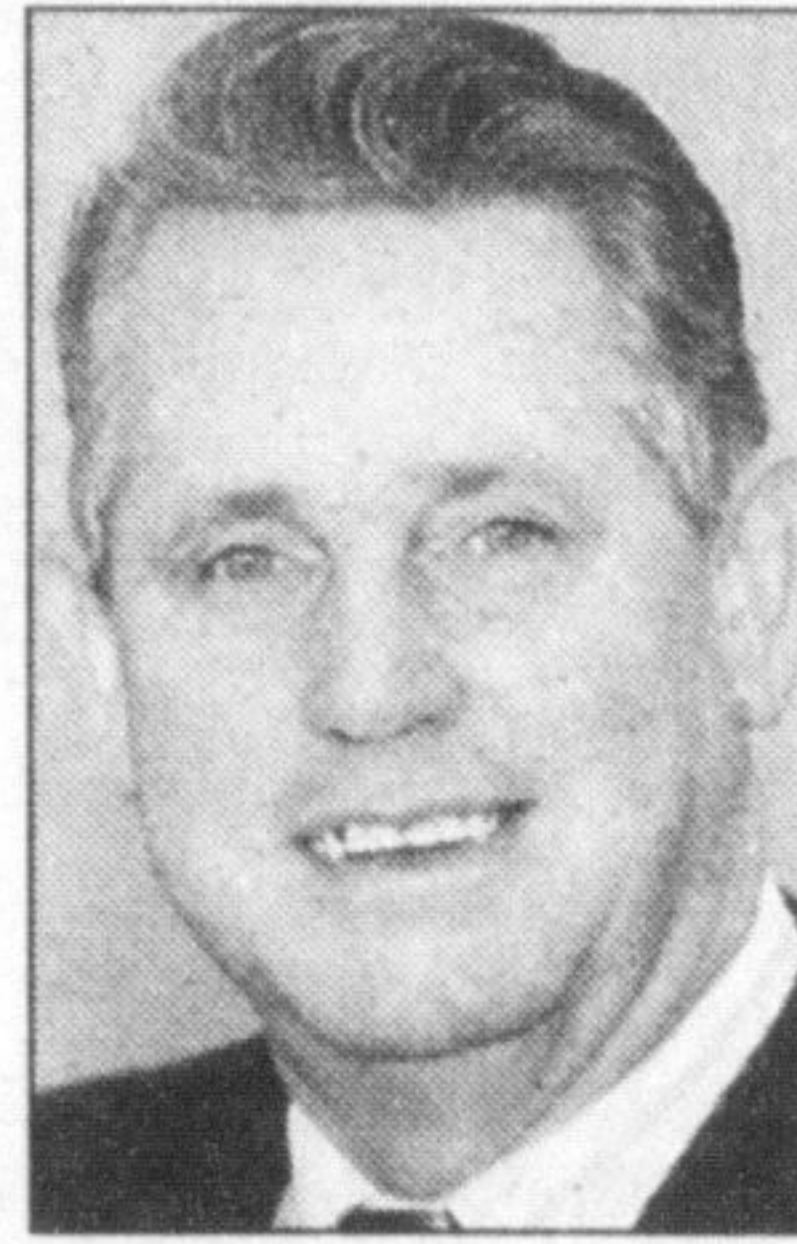

With a goal of \$3.5 million, the CT scanner campaign is the most ambitious fundraiser the MDHF has undertaken since the

hospital expansion project in the mid-1980s.

Money raised will cover the cost of purchasing the new scanner, renovating the existing space to accommodate the scanner and building an annex to expand the size of MDH's current Diagnostic Imaging department.

"We are very happy that Mayor Krantz has decided to join Our Community campaign," said MDHF board of directors' president Kim Mason.

"He has provided excellent leadership to our municipality

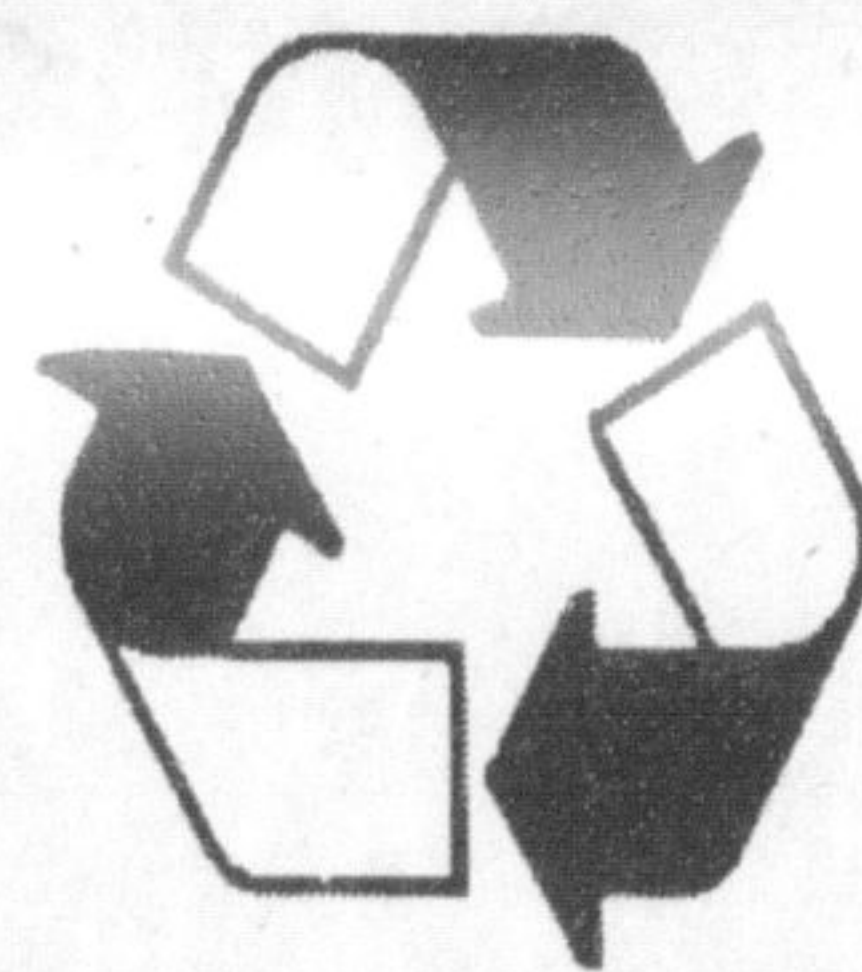

Gord Krantz

over the years and we are confident that his leadership as honorary chair will inspire others to become involved with this campaign."

Every year more than 2,900 Milton residents require a CT scan.

Local residents can get involved in the campaign by attending a photo shoot the MDHF has arranged for September 24 at 1 p.m. at the Milton Fall Fair. A photo will be taken of 2,900 individuals sitting in the grandstands at the Milton Fair Grounds to provide people with a visual representation of the impact the new CT scanner will have.

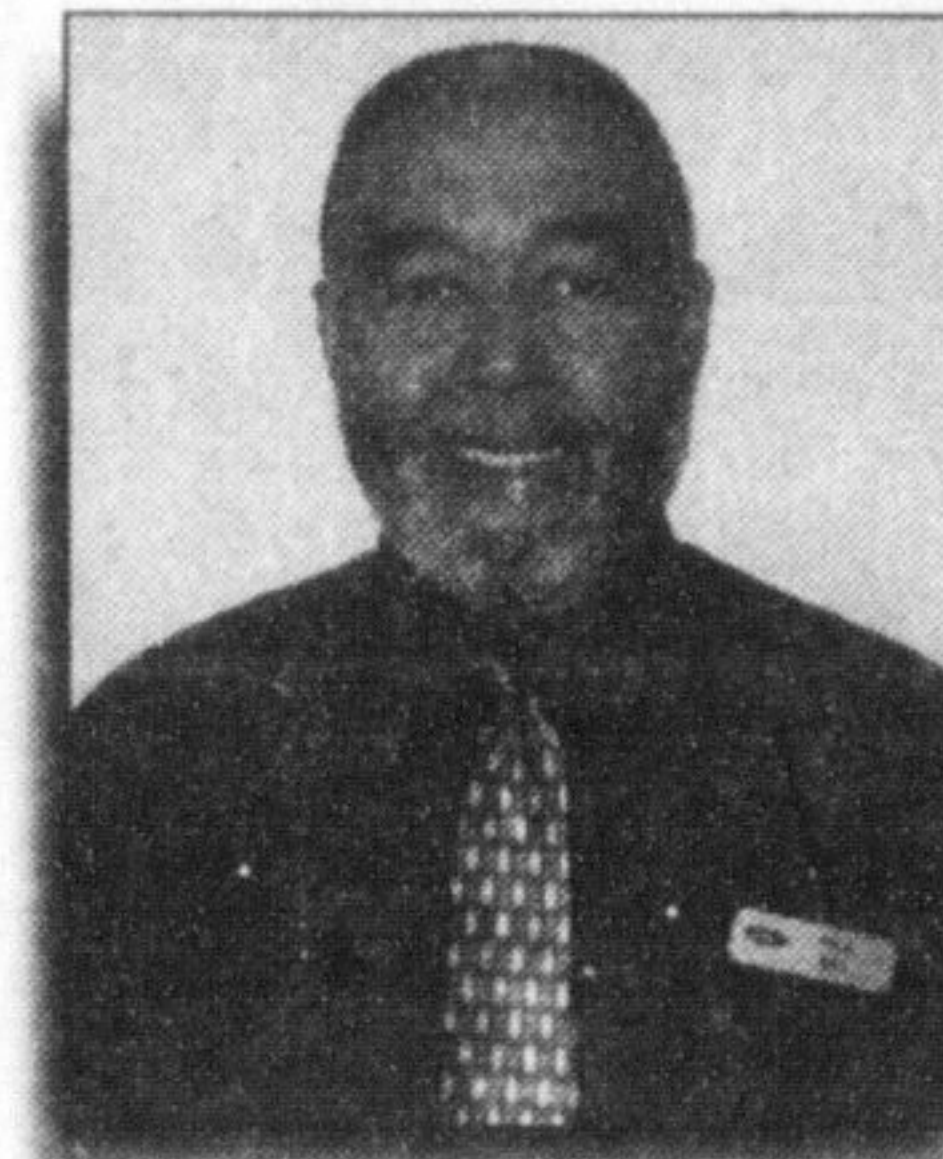

Representatives from the foundation will be on hand to answer any questions about the campaign.

Species at Risk Act

Public Consultations

Environment Canada is requesting feedback from the public on or before September 25, 2006, regarding recovery strategies for one endangered species in your area:

Henslow's Sparrow

The *Species at Risk Act* (SARA), proclaimed in 2003 for the protection of wildlife species at risk in Canada, requires that a recovery strategy be prepared for extirpated, endangered and threatened species. A recovery strategy identifies conservation goals and objectives for the species, including habitat needs, and is the first step toward development of future conservation actions, stewardship and protection.

Proposed recovery strategies are posted on the SARA Public Registry Web site (www.sararegistry.gc.ca) for a 60-day comment period. You are encouraged to check the Registry for a complete version of the recovery strategy and to learn more about species at risk. To receive a paper copy of a recovery strategy, please write to the address below.

Comments can either be submitted on the SARA Public Registry, e-mailed to SARAreistry@ec.gc.ca or sent by regular mail to:
