

AE novices dump Hespeler

Building on a big comeback victory over Georgetown to kick off the regular season, the additional entry novices kept their winning ways going in Hespeler Sunday.

Matthew Mlinarevic and Liam Thomson each tallied twice as the Winterhawks dominated from start to finish, Tyler Gibbs rounded out the scoring, and netminding partners Nicholas Haringa and Mitchell Wiznuik were both steady in their half-game stints.

Solid defence and effective playmaking by Bailey Brown and Carter Taylor, who drew the assists, also factored heavily into the decisive win.

The AE novices' early-season success was interrupted Monday night, when they were white-washed 5-0 by Orangeville. They'll look to rebound from the setback Thursday at MSC against Caledon. Game time is 6:45 p.m.

RepHockey

Atoms doubled up

Milton's AA atoms are still looking for their first win of the regular season following Saturday's 4-2 loss to the host Guelph Storm.

Two third-period powerplay goals less than a minute apart eventually did in the Winterhawks, who'd headed into the final frame with the lead on back-to-back deposits by Marcus Miller and Adam Wilson. Miller, Justin Brown and Austin Dezeeuw drew the assists, while Connor Hallyburton was between the pipes.

Now 0-2, the AA atoms will host their home opener tomorrow afternoon at MSC against Orangeville. Game time is 5 p.m.

Install Smoke Alarms

It's The Law.

The Ontario Fire Code requires that every home have working smoke alarms. Install them in your home or cottage today!

John Rothwell, President, and Charlie Spiring, Chairman and CEO, are pleased to announce that **Tracey McGrath, CFP**, **Terry van Dreumel, CFP**, **Bruce Folkard**, and **Vickie Braden** have joined the Firm. **The McGrath Team's** arrival also marks the opening of the Firm's 27th office, and the 8th in Ontario alone.

With decades of shared estate, tax, insurance, and investment planning expertise, The McGrath team provides professional guidance to their clients in order to build and protect their wealth. They are dedicated to providing the highest level of customer service, and their commitment to clients complements Wellington's client-first philosophy.

Wellington West Capital Inc. is one of Canada's fastest growing financial services firms. With over 7.5 billion in assets under administration, Wellington West has been ranked #1 for the third year in a row in the Annual Brokerage Report survey, conducted by Investment Executive, a leading industry publication.

Chief Energy Conservation
Officer of Ontario

Get the right tools for the job

Crisp mornings, foggy windshields, falling leaves – and the job jar. Fall has definitely arrived!

In the coming weeks, you'll probably find yourself fixing leaky faucets, installing weather-stripping, raking leaves, or putting a fresh coat of paint in the living room. And this likely means a trip to the store to pick up the right tool for the job.

As Ontario's Chief Energy Conservation Officer, I'd like to see each Ontario household add one more job to the jar this fall: improving your home's energy efficiency. The Ontario Power Authority and your local electricity company will help you choose the right tools.

Since households use electricity differently, the right tools for your household might not be the best ones for your neighbour. *The Every Kilowatt Counts* energy savings campaign will provide all Ontario households with information and coupons redeemable at more than 3,000 stores across the province to put the right tools in your hands to control your electricity use.

Watch for the *Every Kilowatt Counts* brochure in the mail. It contains more than \$35 in savings on these energy efficiency tools:

ENERGY STAR® qualified Compact Fluorescent Lights Bulbs consume 75% less electricity than regular incandescent bulbs. A typical house has 30 light bulbs that together consume about \$200 in electricity each year. Replacing five incandescent bulbs with CFLs will save around \$30 each year.

Seasonal LED lights use 95% less energy than standard mini-lights: a 70-light string of incandescent bulbs costs \$7.70 over 200 hours while an LED string costs just 8 cents!

Dimmer switches set the mood, help you use less electricity and extend the life of your bulbs.

Programmable Thermostats allow you to program your furnace to warm the house when you arrive home for the evening, and set back to a cooler temperature when you're asleep or away. 20° Celsius is comfortable for when you're home and 18° Celsius when you're asleep or away. And they work with your A/C in the summer, too!

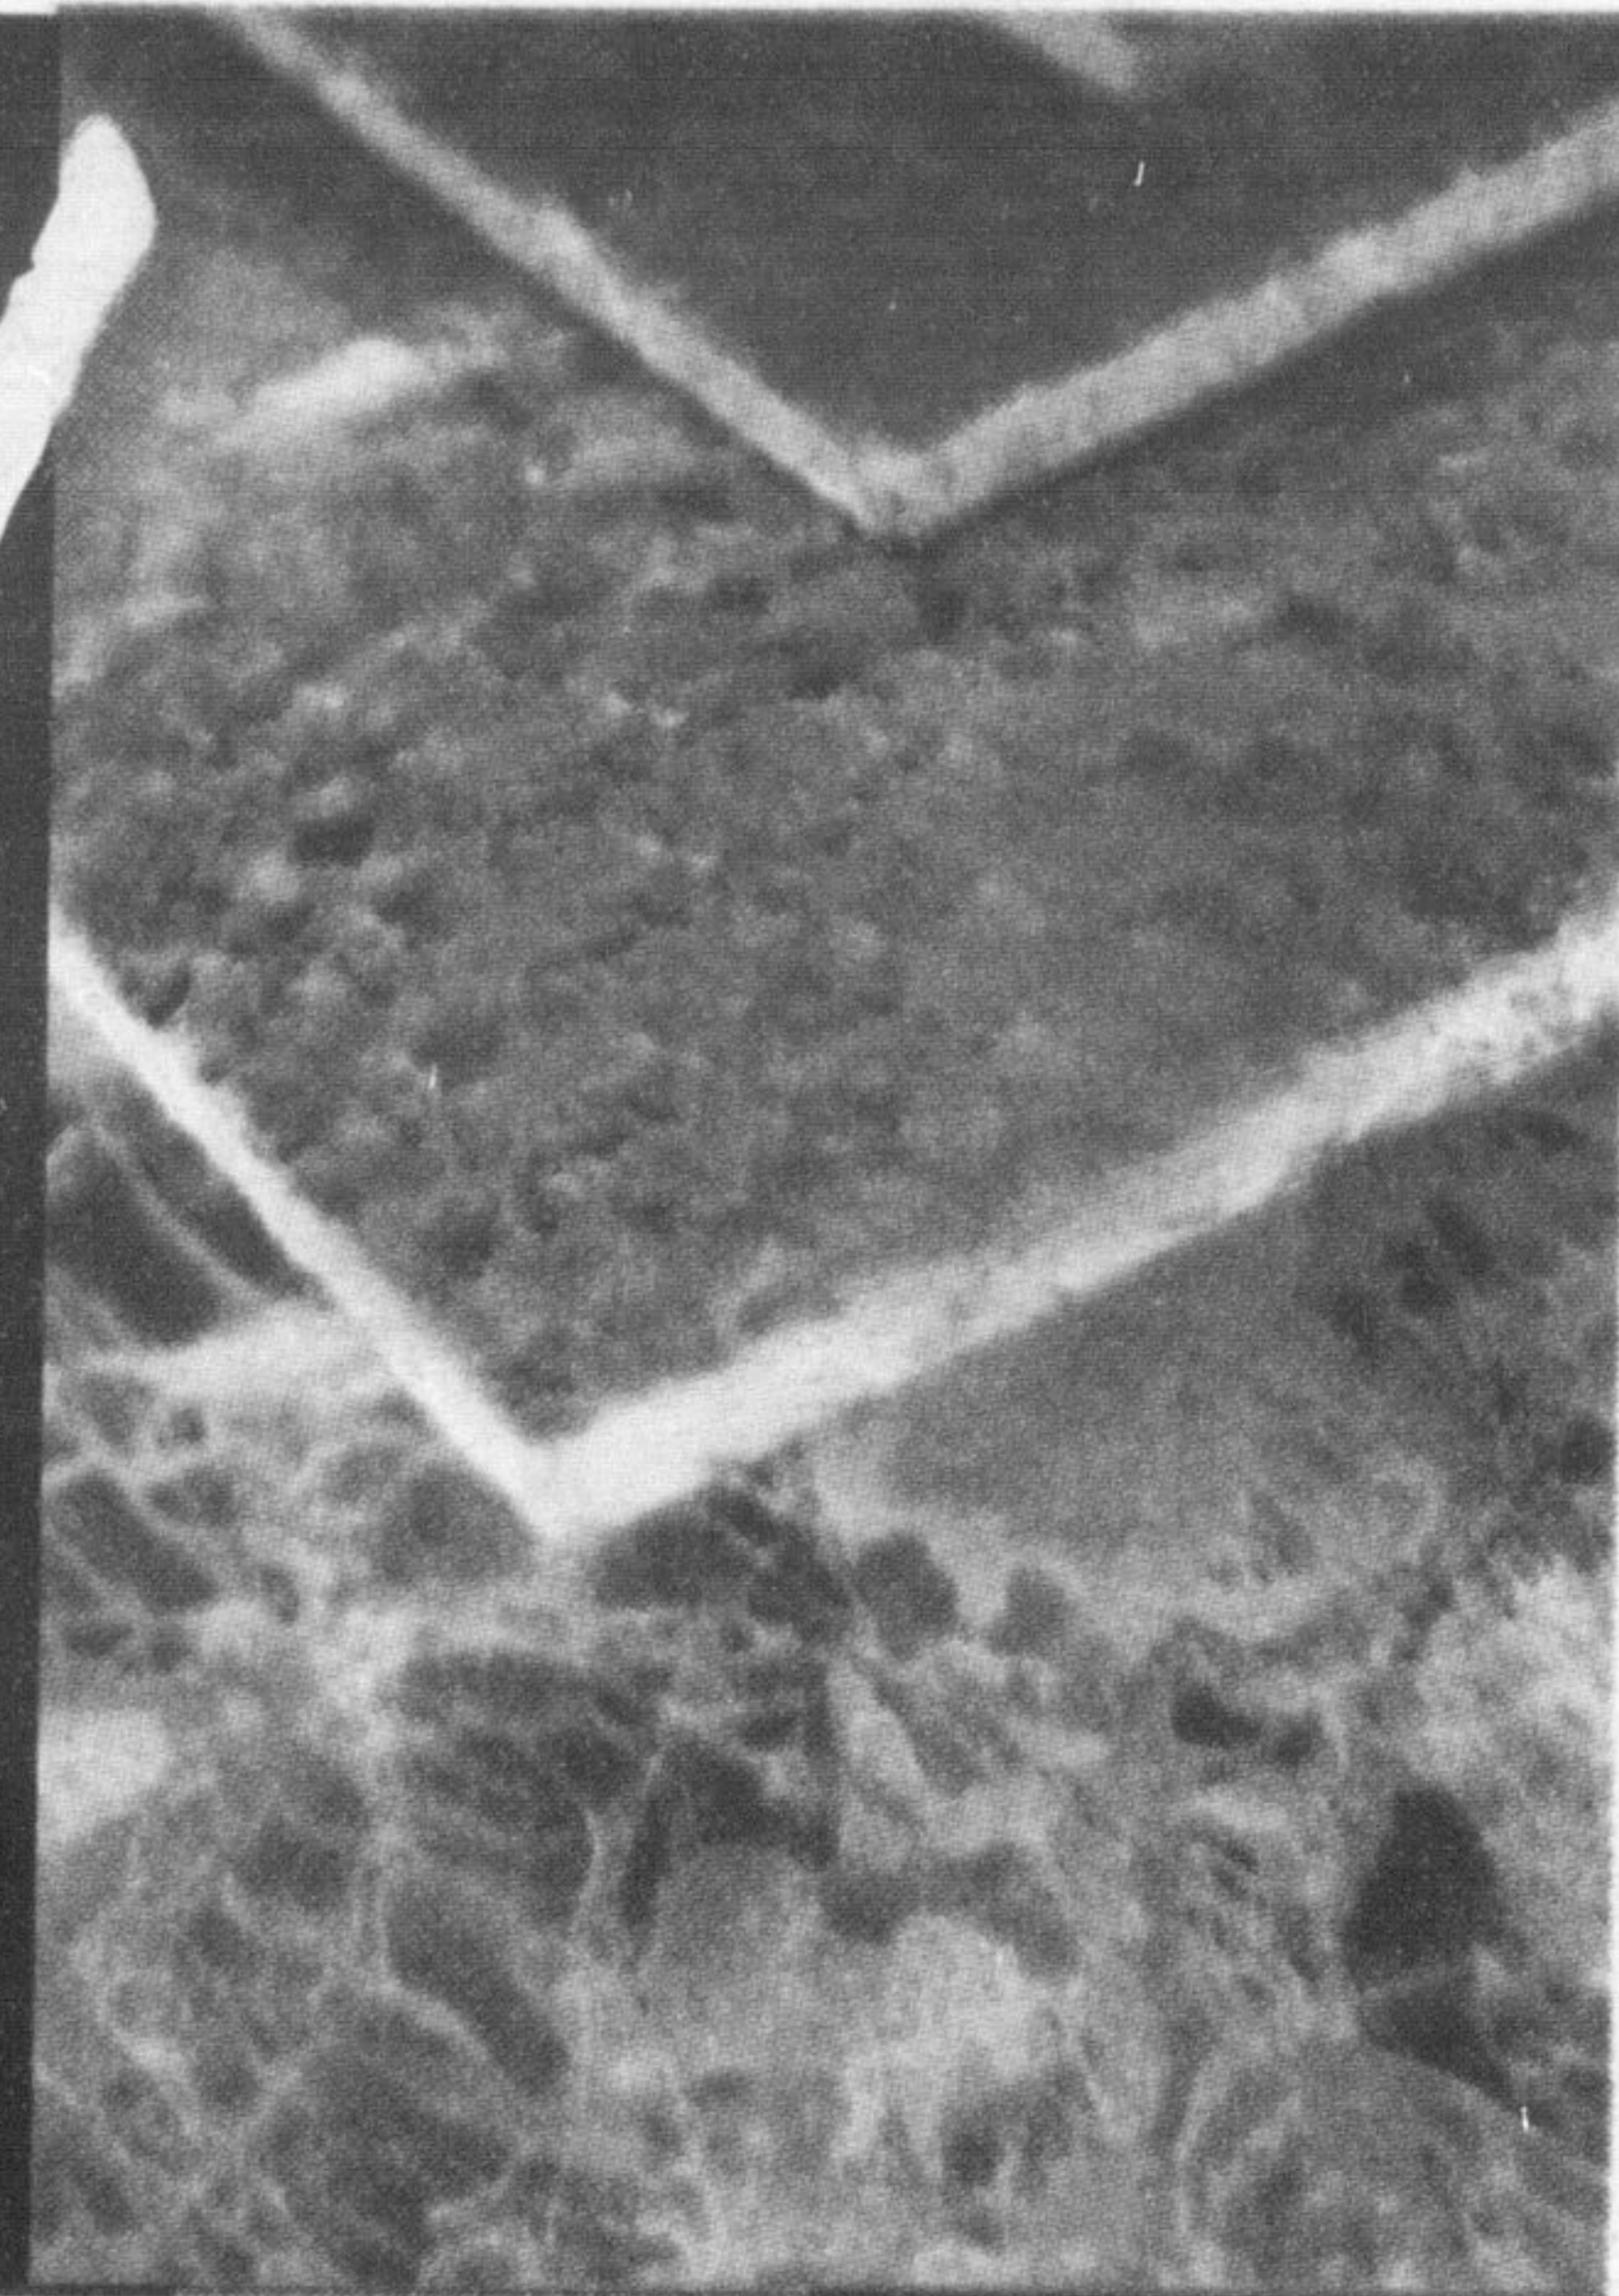

Baseboard Programmable Thermostats work for homes, condos or apartments that have electric baseboard heaters.

Motion detectors give you the convenience of having the lights turn on automatically when you walk into a room or up to the front porch and shut off when you leave. Great for rooms where the kids play – no more nagging to get them to turn out the lights! Every kilowatt really does count.

Choosing the products that are right for your home could save you up to 10 per cent on your electricity bill and will help Ontario meet its energy supply challenge. For more information, call 1-866-859-9898 or visit www.conservationbureau.on.ca
