

EYELASH ENHANCEMENT is one of the most popular make-up procedures. This procedure supplements sparse eyelashes, making them appear fuller. All the work is done between the lashes. The beauty of it is that no one knows you had any work done due to the natural look you end up with.

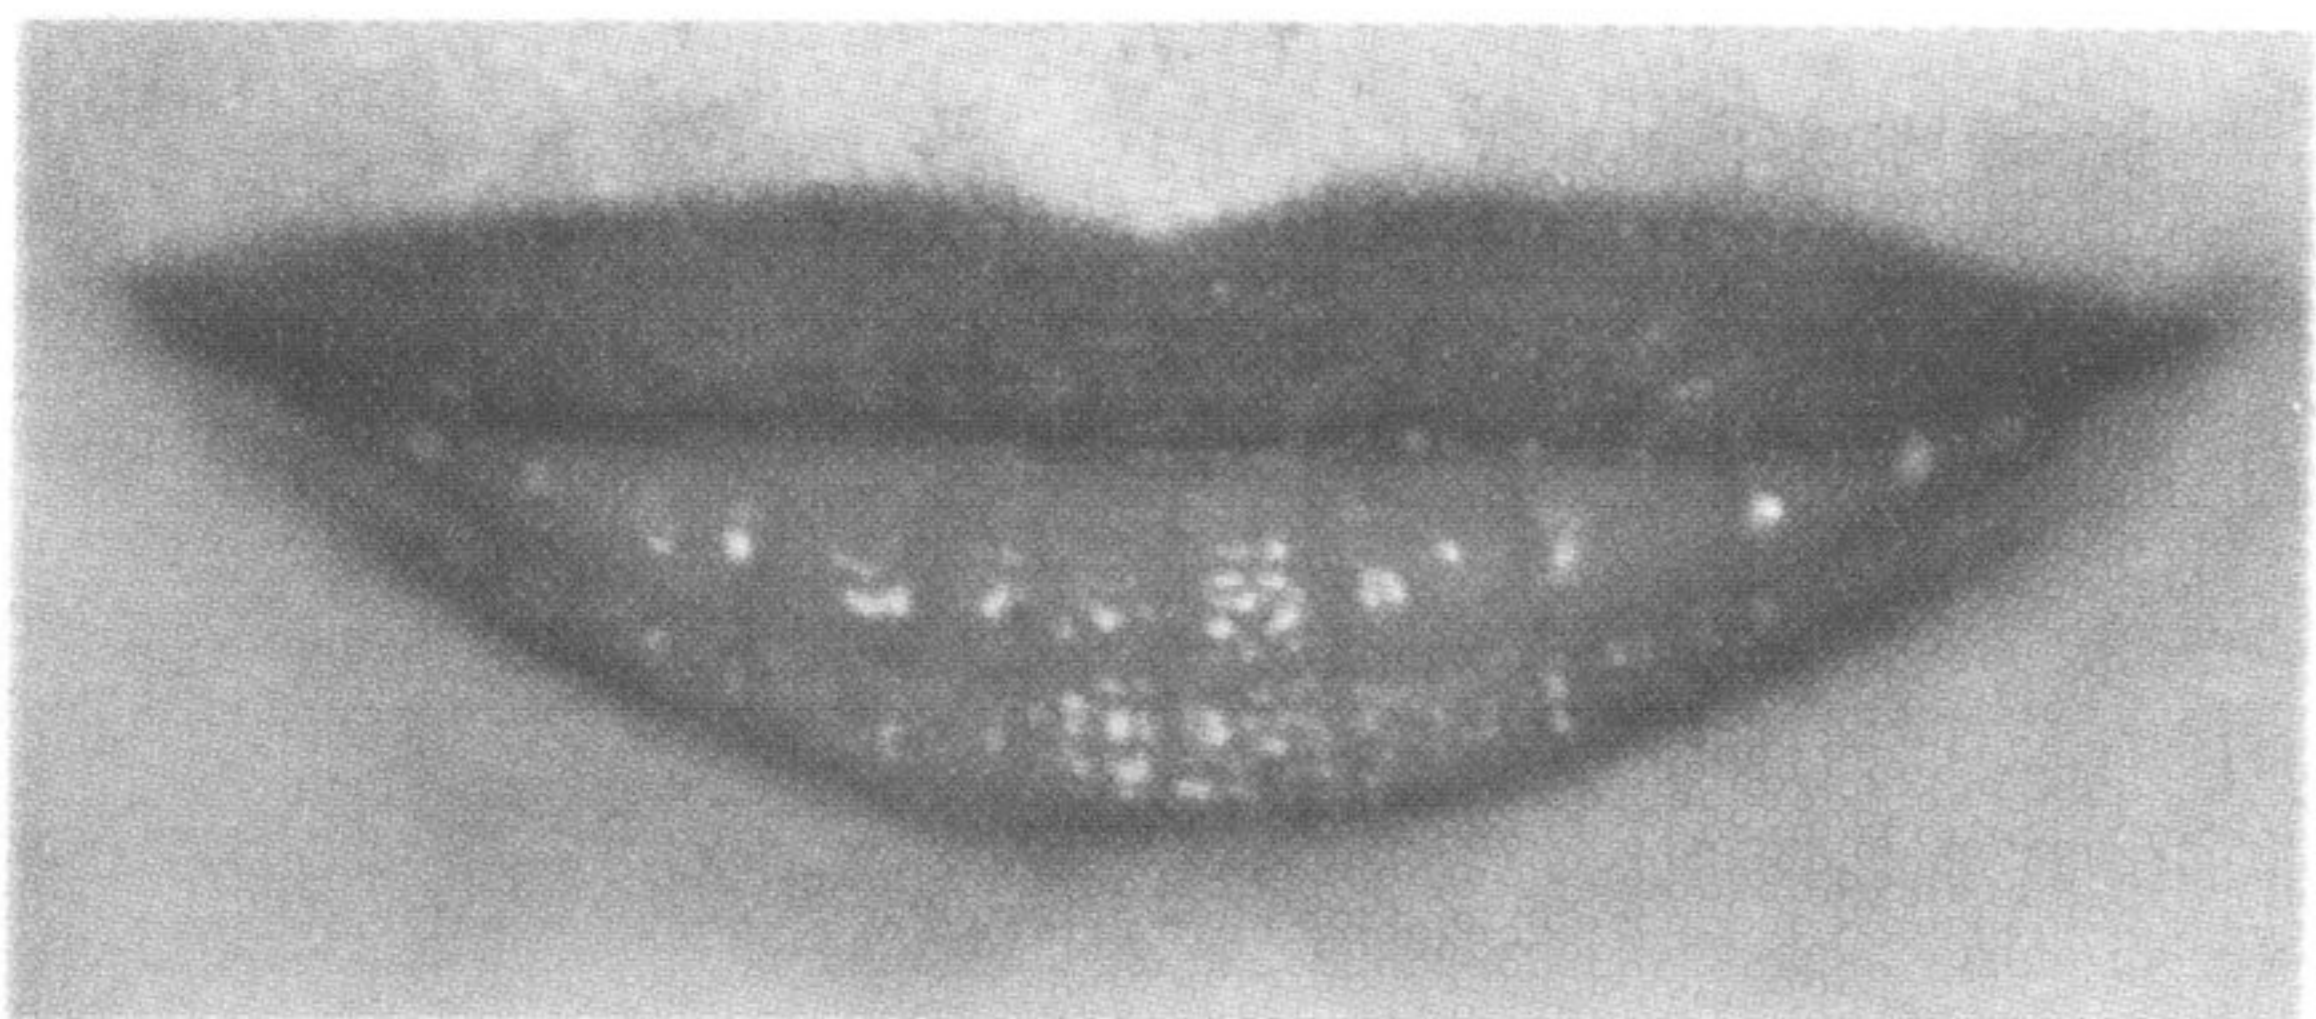

EYELINER is just what it says, all my work is done above the lashes creating a smooth flawless line. Lining the upper and lower lids adds depth and definition to the eyes.

EYEBROWS bring the whole face into balance. Not only do eyebrows frame the features of the face, but when properly defined they have the ability to alter the entire facial shape. I add style and definition to sparse or half formed eyebrows by using the "Hair Stroke Method".

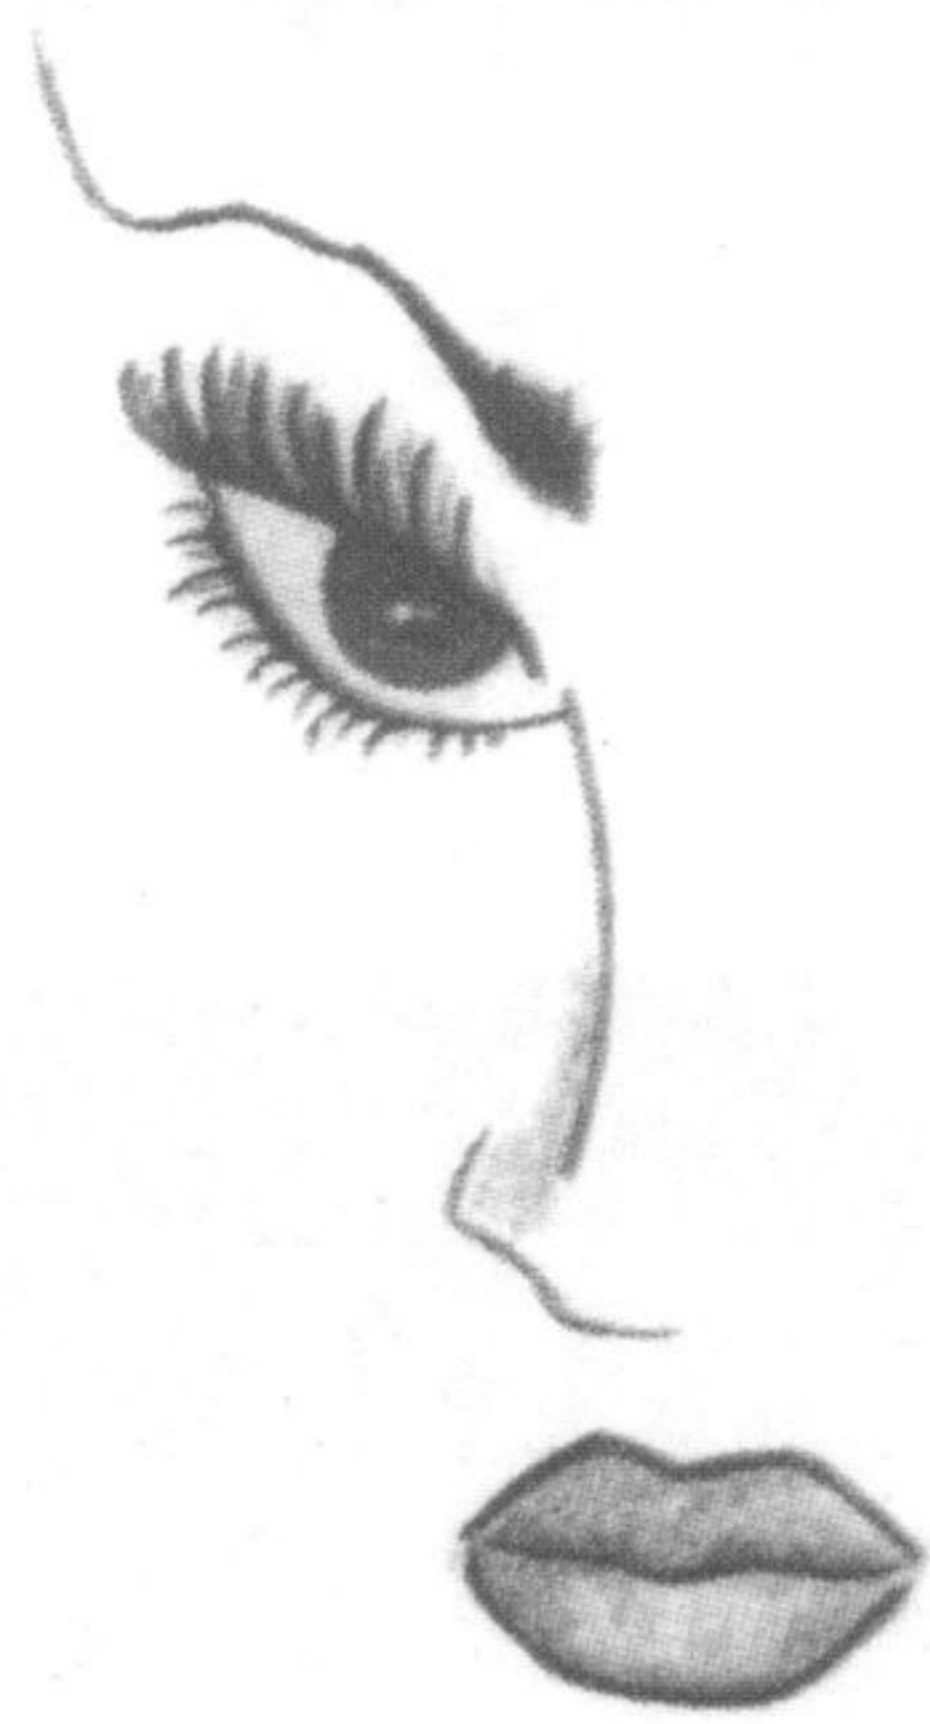

BEFORE

AFTER

LIPLINER adds definition and can bring back the natural colour and shape you once had, or it can correct irregularities to create the shape you would like. Lip filler evens out the colour of the lips and helps prevent lipstick from bleeding.

PERMANENT MAKE-UP INC.

"Looking great all the time is not cheating!"

For the past 10 years I have been working with Dr. Stephen Brown in Oakville and also have a studio in Milton.

This is a very interesting field. My specialty procedures have been Eyebrow Reshaping, Eyelash Enhancements combined with Eyeliner and Lipliner/full colour Micro Pigmentation Enhancements. My clients range from the ages of 18 to 94.

My expertise has recently gained me recognition through formal training in licensed Paramedical Procedures such as Scar Camouflage and Areola Replacement after reconstructive breast surgery. I am privileged to be working with several Plastic Surgeons in the area who perform this delicate surgery. More and more women are getting breast cancer, however the positive side is the option to have reconstructive surgery. Then that is where I would come in, after all the work is done I would do Micro Pigmentation to replace the areolas. I do my very best to create a 3 dimensional look.

I also do reconstructive work after an accident. If the client is missing part of an eyebrow, eyeliner or lip line I can create a new one for them.

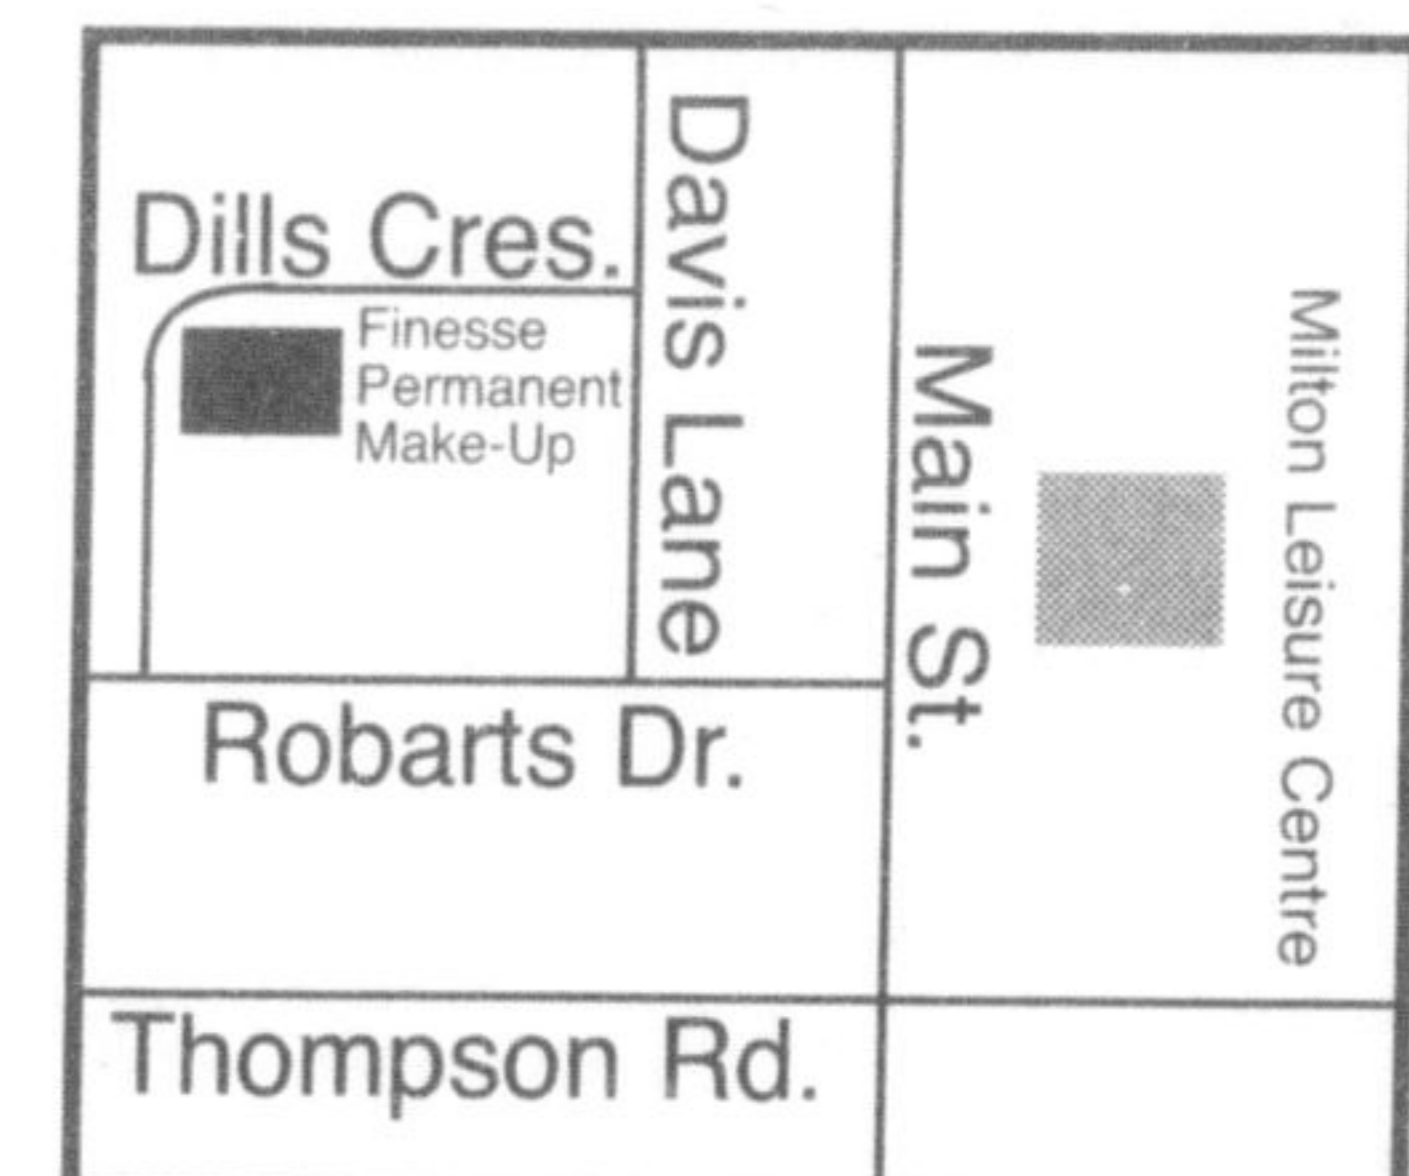

Alopecia (hair loss) is another interesting part of my work. I can create the look of having eyelashes, when the person is missing them. Or reshape and create an eyebrow to reframe the face.

All my pigments are MRI safe and I am Health Canada approved. None of my pigments contain any inks, therefore they do not bleed into the skin. The equipment I use is from Germany and is state of the art.

I love what I do, and my work speaks for itself.

Please call Finesse Permanent Make-Up Inc. and ask for Ann-Marie for a complimentary consultation at 905-876-0105.
