# LOOKING GOOD, FEELING GOOD

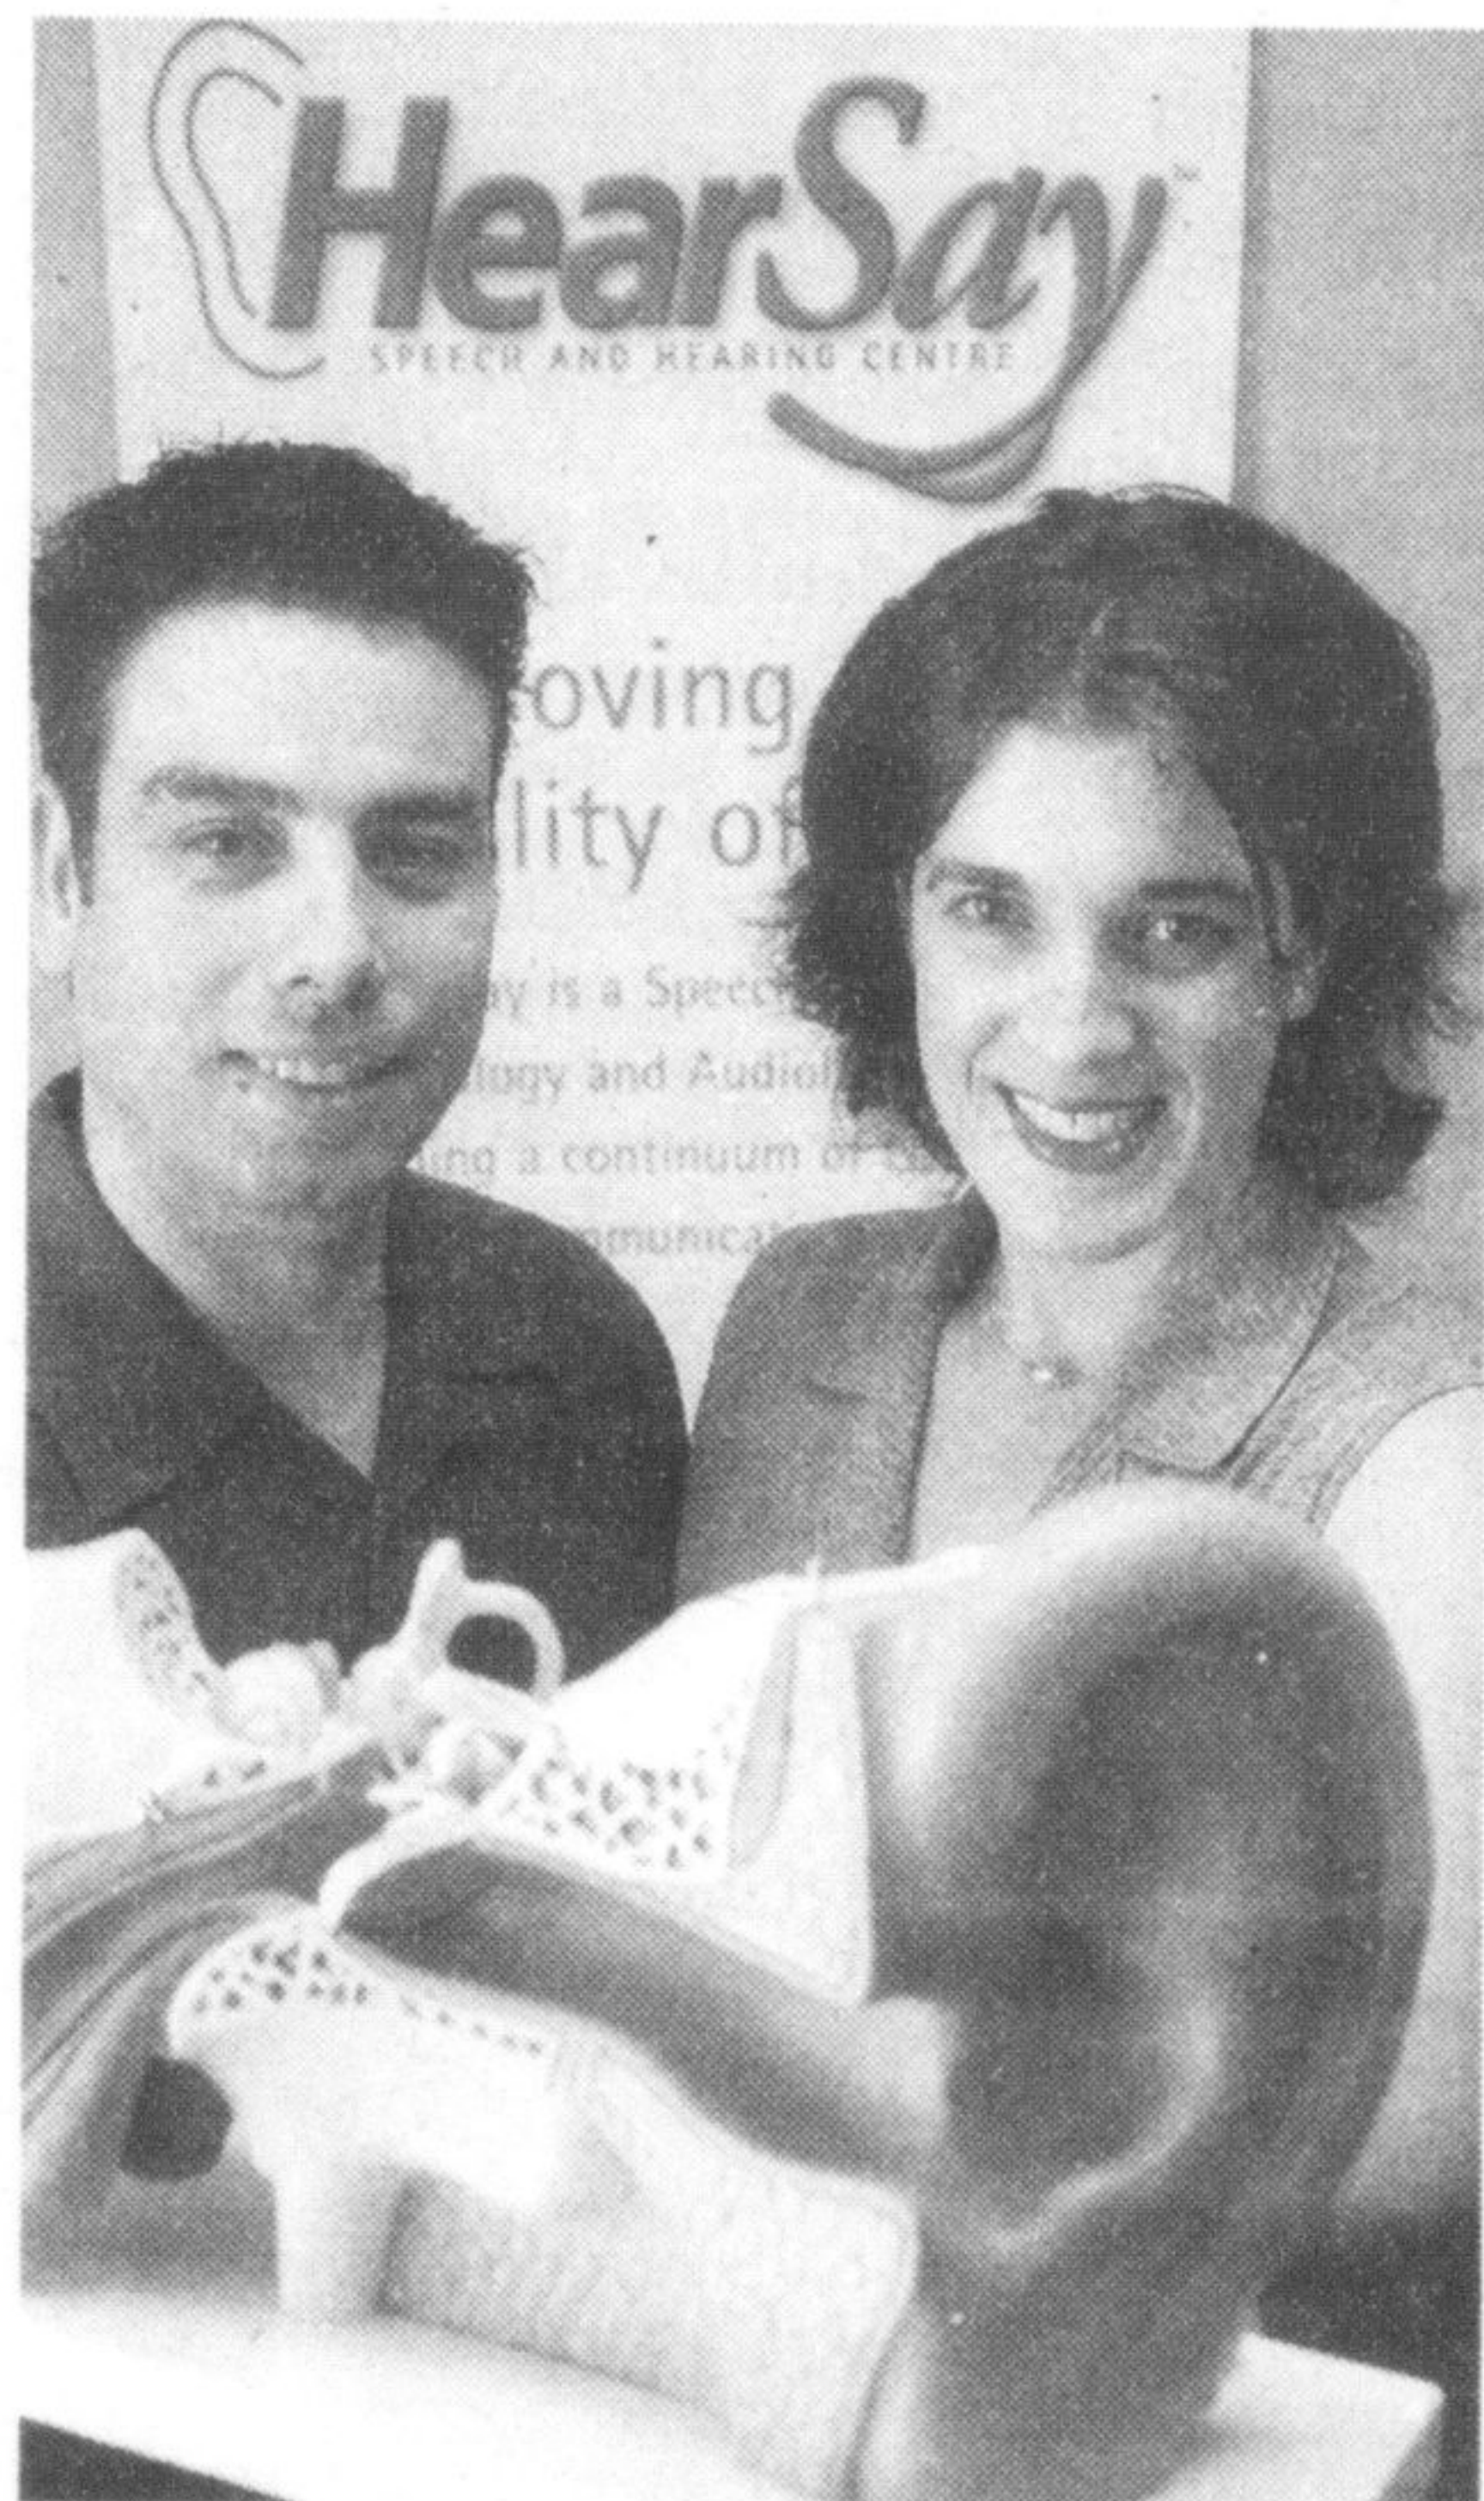

## Hearing Loss Doesn't Have to Restrict Your Life

A visit to the HearSay Speech & Hearing Centre requires no referral from your doctor, and patients can consult with the Audiologists, Yvonne and Rui Oliveira. After asking relevant questions pertaining to a patient's hearing loss, an extensive hearing evaluation is performed. Following the evaluation, an explanation of what has happened to the patient is provided, followed by thorough counseling, and amplification options if they are required.

Today's technological advancements mean that hearing aids can be surprisingly comfortable and discrete. There are several types of hearing aids, each with different advantages, depending on its design, level of amplification and size.

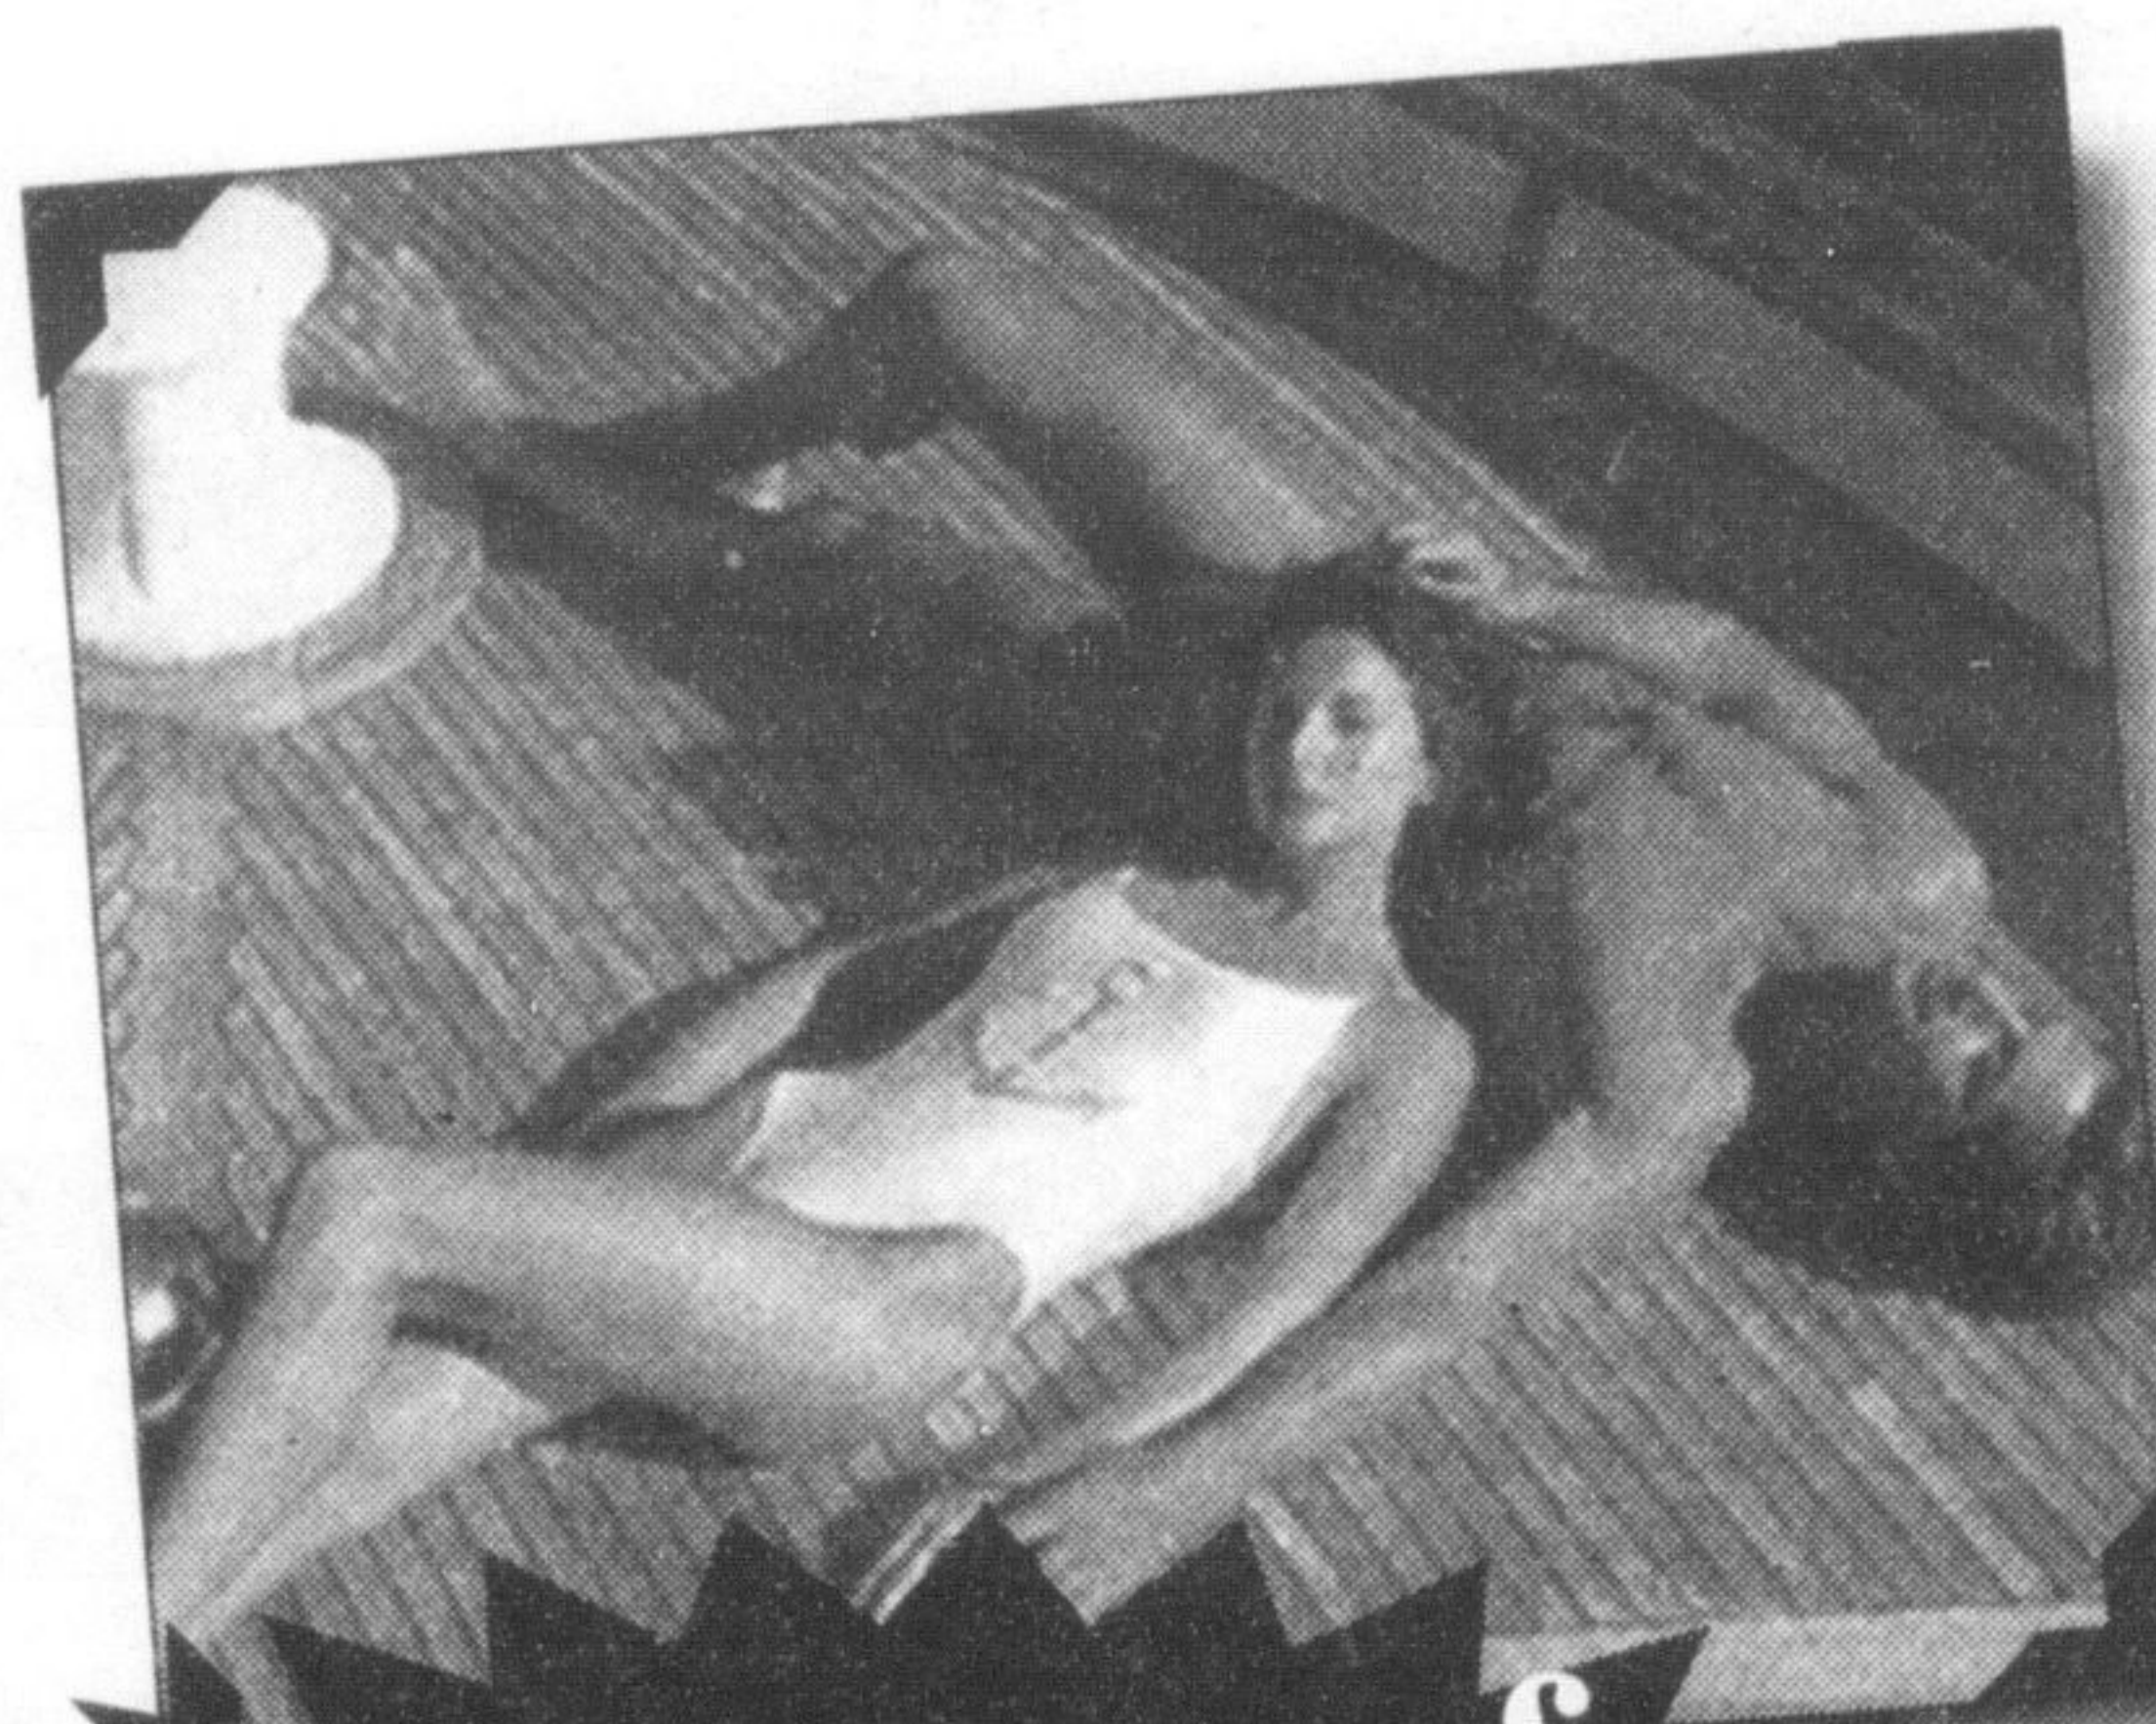

Based on your listening needs, type of hearing loss and lifestyle, the audiologist at the HearSay Speech & Hearing Centre will advise you on which hearing aid styles and features best meet your communication needs.

Hearing loss does not have to restrict your life or the activities you enjoy. Proper fit hearing aids with appropriate communication strategies can help in

many listening situations. **Call the HearSay Speech & Hearing Centre for further information or to book an appointment at (905)875-3345.**

### REMEMBER TO RECYCLE!

**With a little extra effort, recycling saves a lot!**

One ton of recycled paper saves up to 17 trees. Recycling paper, plastic and metal saves tons of garbage from being put into local landfills. These are just a few of the many reasons to recycle and use recycled products. By cutting down on waste and using more eco-friendly products, we can keep Milton and our planet a healthy, beautiful place to live.

### SMOKING... What's The Point?

Someday, you'll be offered a cigarette or be tempted to smoke. Before you start, think about it: every drag you take screws up your body. Smoking can cause permanent damage to your body. Once a person starts, it becomes extremely tough to quit. And did we

mention all that cash you'll be blowing in the process? So, if you're tempted to start, ask yourself, "What's the point?"
