

# Milton Success Stories

## Advancing The Art of Cosmetic & Laser Services

The Electrolysis College of Canada Inc. is in its tenth year of operation as not only a training centre, but offers a fulltime cosmetic and laser clinic for the public. The Director Judith Finn, with 22 years experience and fulltime expert staff, use several of the most powerful and fastest lasers in the field for permanent hair removal as well as electrolysis for those with light or blonde hair.

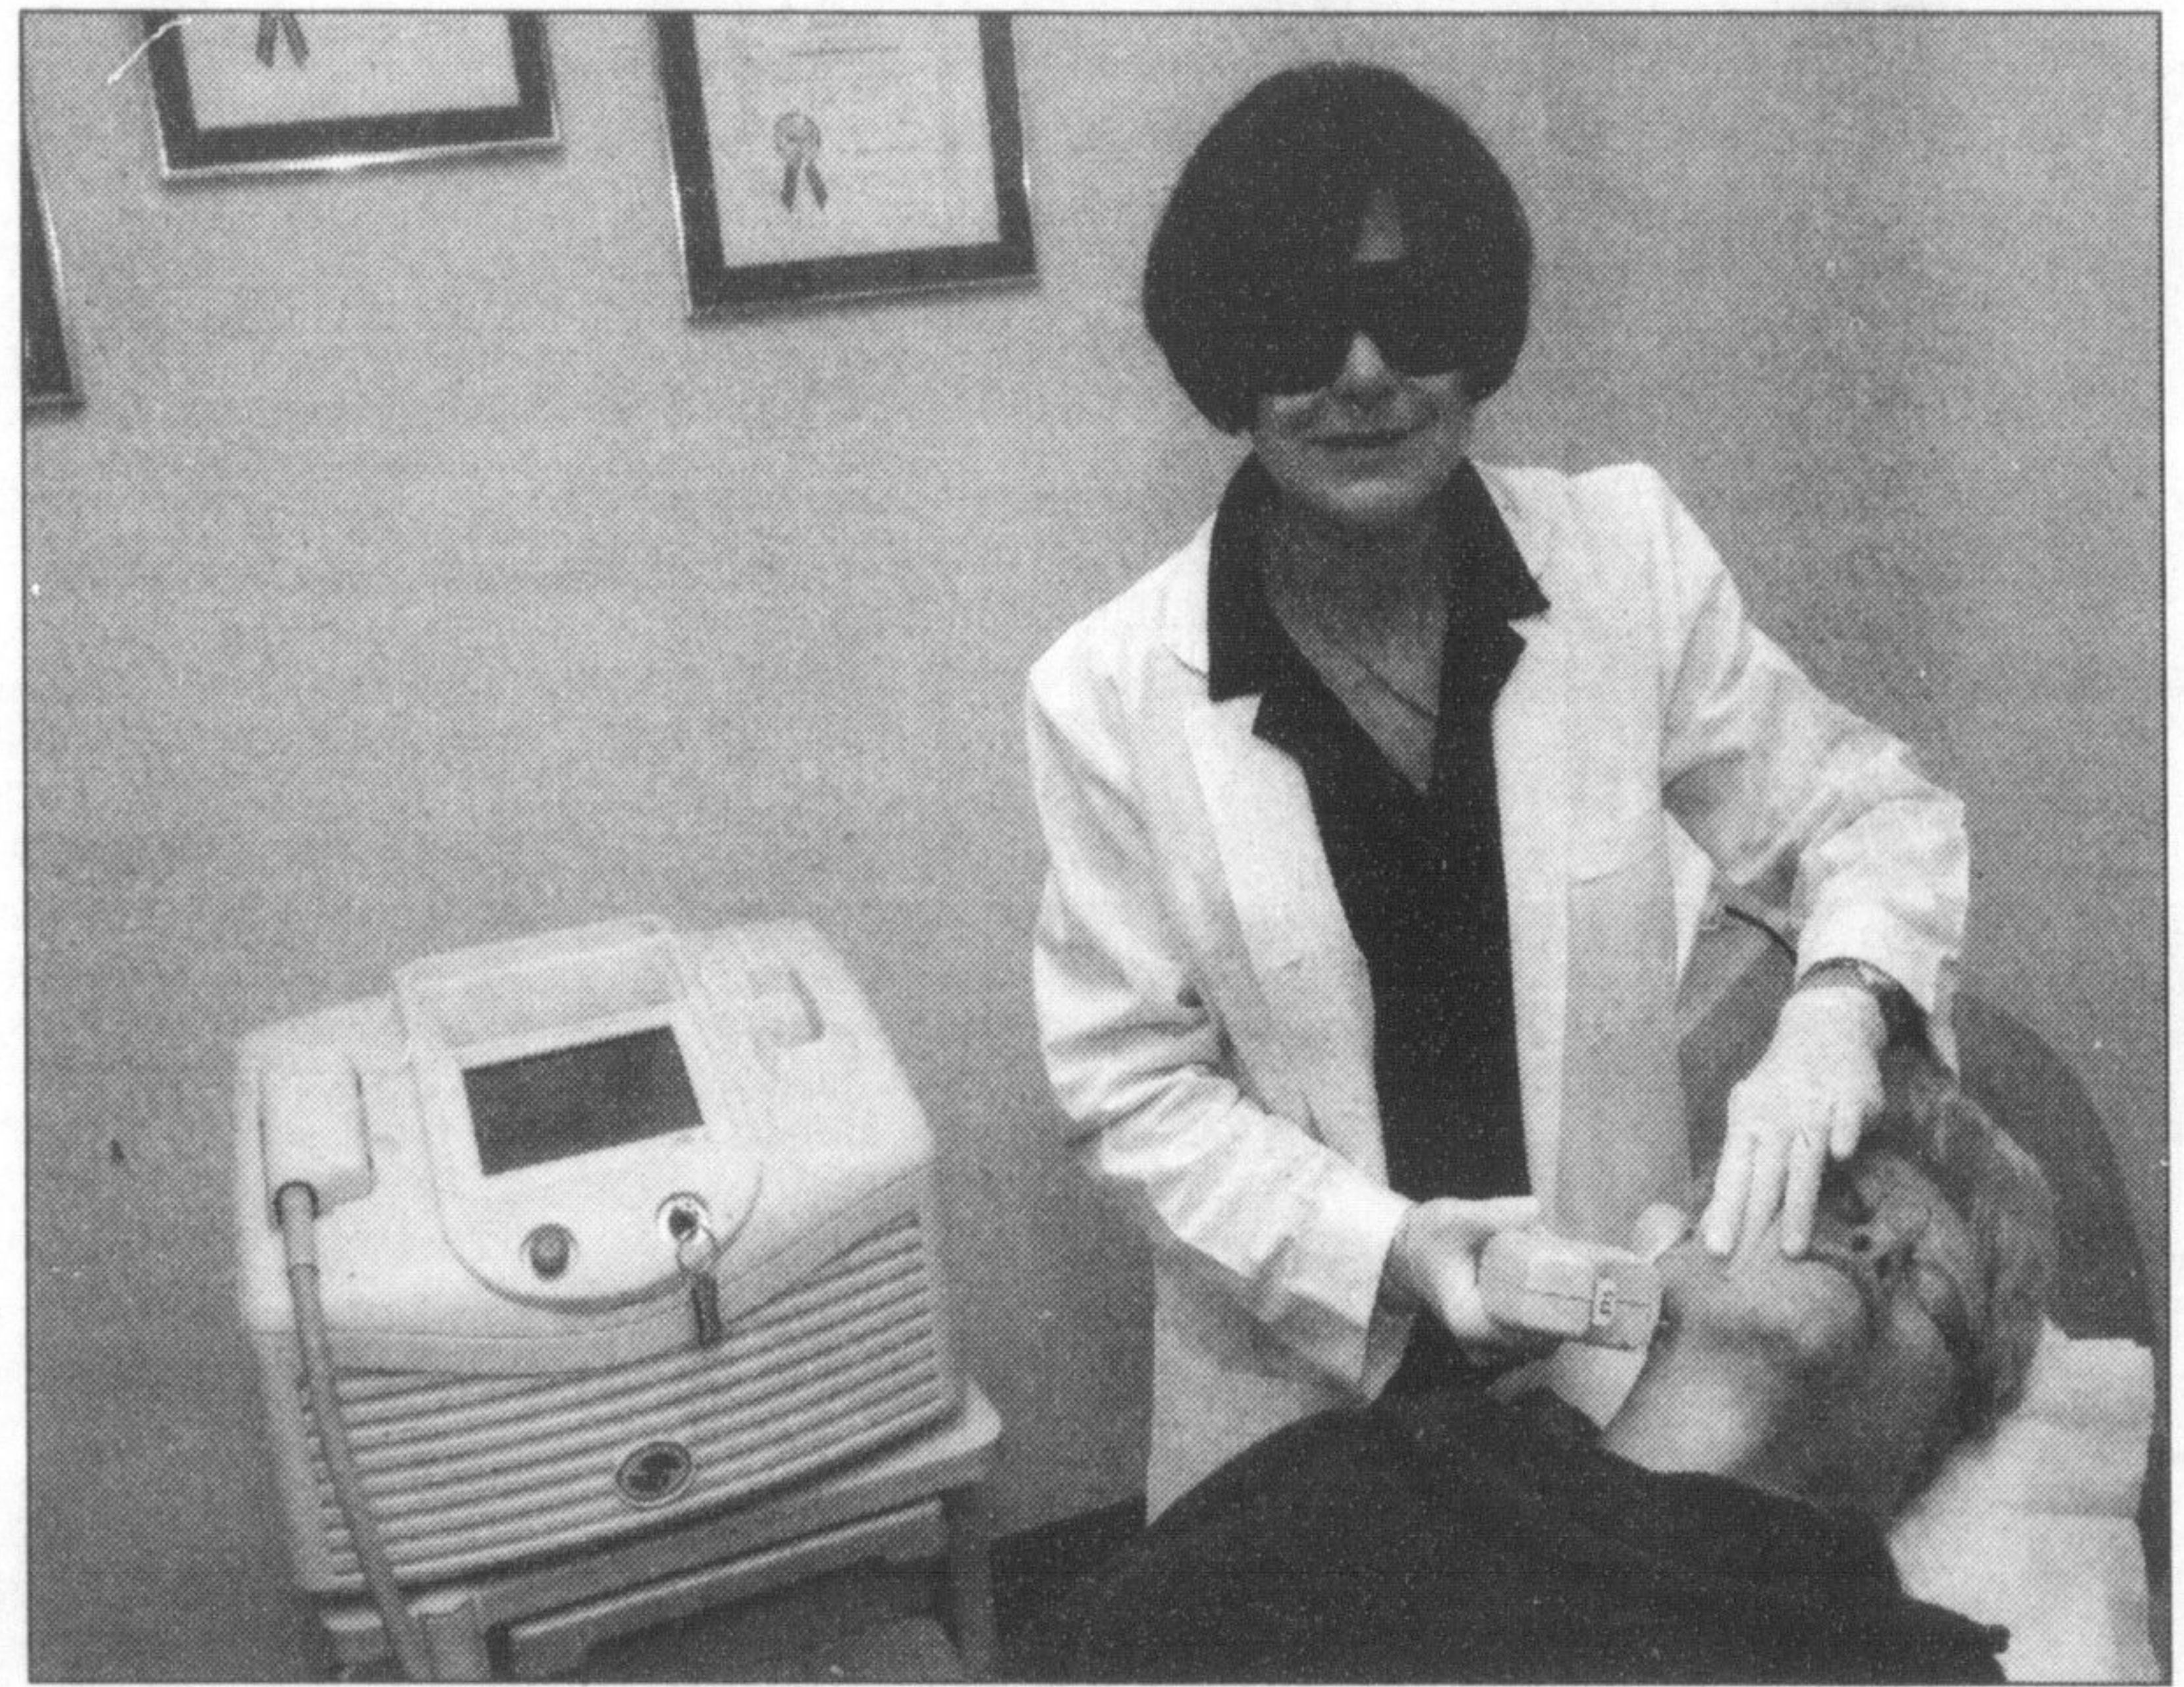

As a pioneer in the laser field, the college strives to stay abreast of all the latest technologies for not only hair removal but to help those who are afflicted with acne, rosacea, sun-damage and other vascular blemishes.

The College is one of the first in Canada to provide the very powerful and effective BBL Technology with variable wavelengths to treat a variety of skin conditions as well as Skin Tightening. The success of the clinic has always

hinged on the in-depth knowledge and expertise of it's practitioners to microscopically analyze the skin to determine the underlying causes of certain conditions and to perform the appropriate treatment for each individual. Whether it is for cosmetic or medical treatments the college is here to help people feel better about themselves. Our clientele reach us from throughout Ontario and the US, and finds the Medical Arts clinic to be very central and a pleasurable place to come for treatment.

The clinic provides many other unique services such as medical microdermabrasion, medical peels, and a full line of medical skin care. We offer complimentary consultations and welcome your

inquiries regarding any of the services the college has to offer. The clinic is open six days with evening hours as well to accommodate everyone's busy lifestyle.
