The Regional Municipality of Halton

NOTICE OF PUBLIC INFORMATION CENTRE

ZONE 5 LAKE-BASED WATER RESERVOIR AND FEEDERMAIN TOWN OF MILTON & HALTON HILLS 401 CORRIDOR CLASS ENVIRONMENTAL ASSESSMENT STUDY

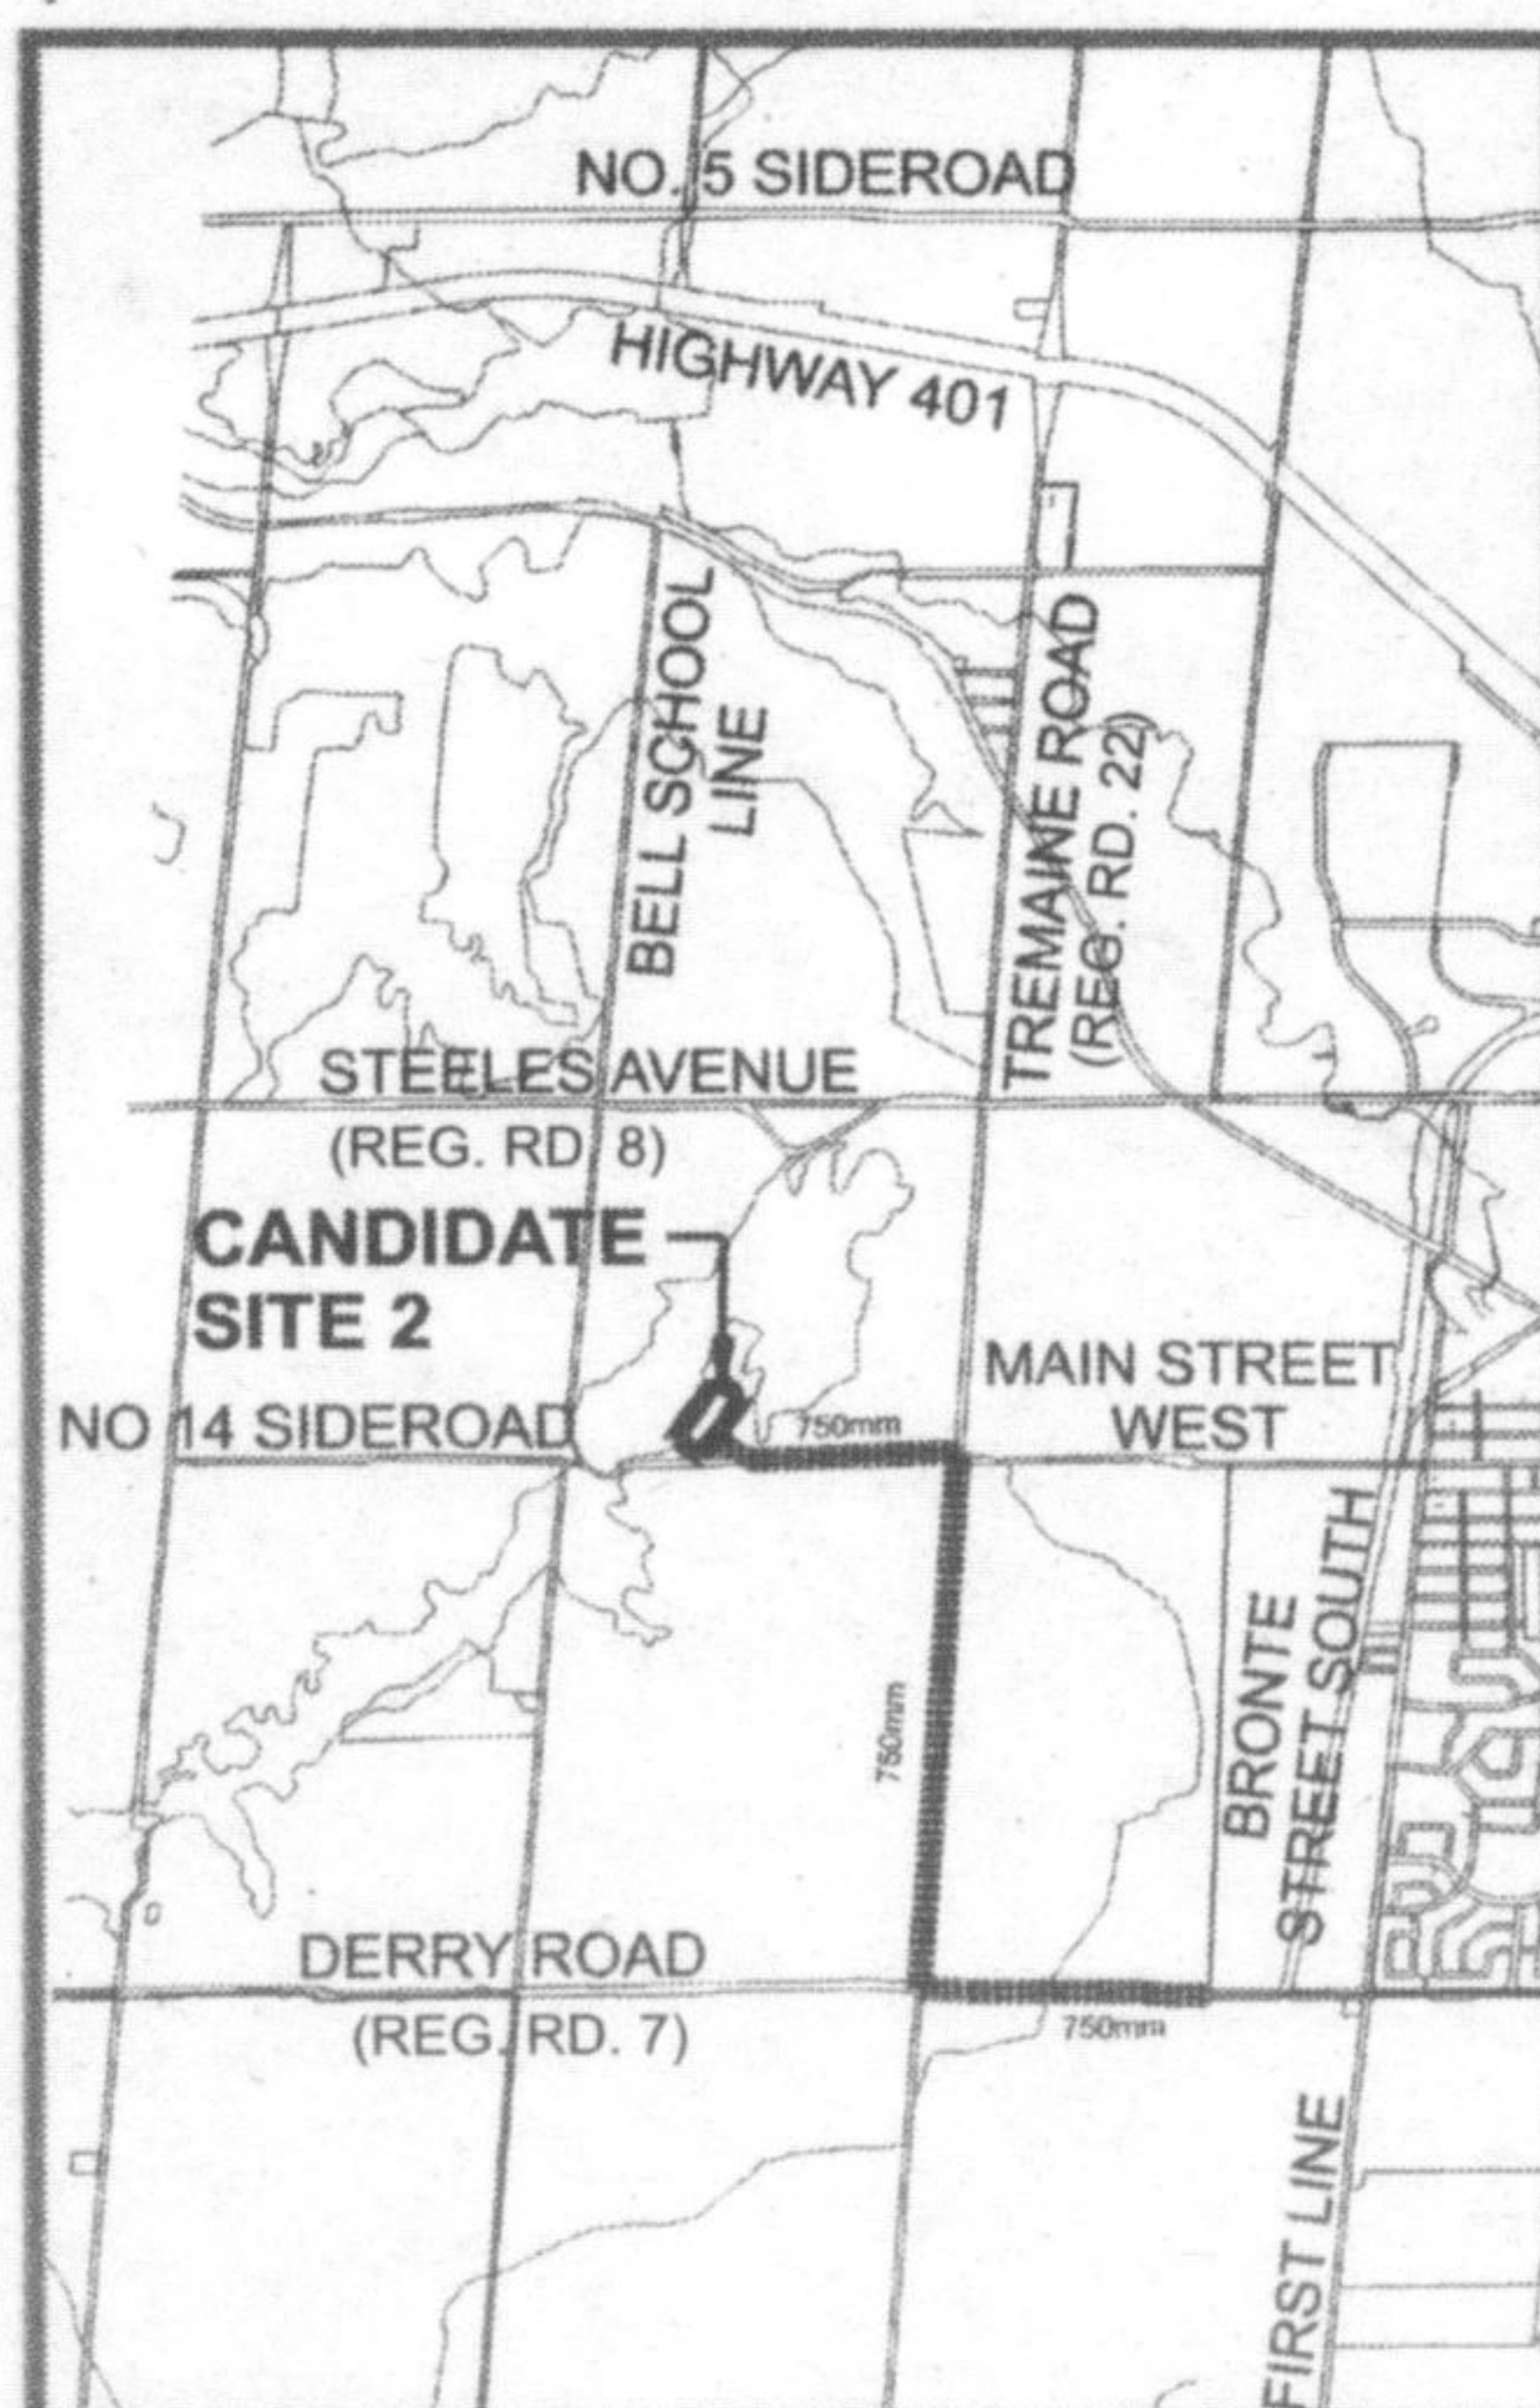

The Regional Municipality of Halton is currently undertaking a Schedule B Class Environmental Assessment (EA) study to assess the impacts of the Milton Zone 5 lake-based (5-L) water reservoir and feedermain, which were identified as priority projects in the Halton Region Water and Wastewater Master Plan Review (October 2002). The Milton 5-L water reservoir and feedermain are required to provide water services to new and existing development located in the Town of Milton and the Halton Hills 401 Corridor urban areas.

The recommended solution is to locate a below-ground water reservoir on the north side of No. 14 Sideroad, east of Bell School Line. The feedermain would run east along No. 14 Sideroad, south along Tremaine Road (Regional Road 22) and east along Derry Road (Regional Road 7) to connect with the existing water distribution system.

As part of the Class EA, public input is being sought on the recommended siting of the reservoir and the alignment of the feedermain. If you would like to provide input on the recommended solution, or receive more information on the Class EA process undertaken, please attend a Public Information Centre (PIC), which will be held:

DATE: THURSDAY, MARCH 29, 2007
LOCATION: MILTON SPORTS CENTRE, BANQUET ROOM
605 SANTA MARIA BOULEVARD, MILTON
TIME: 5:30 P.M. - 8:00 P.M.

You are invited to drop in any time during the above-noted hours to review and comment on the recommended reservoir site and the feedermain alignment. Comments received from this PIC will be considered when finalizing the preferred solution.

This Notice first issued March 15, 2007.

For further information or if you are unable to attend the PIC and wish to provide your comments, please contact one of the following:

Magda Bielawski, P.Eng.

The map shows the recommended reservoir site and feedermain alignment.

iRecycle

because it saves energy and resources.

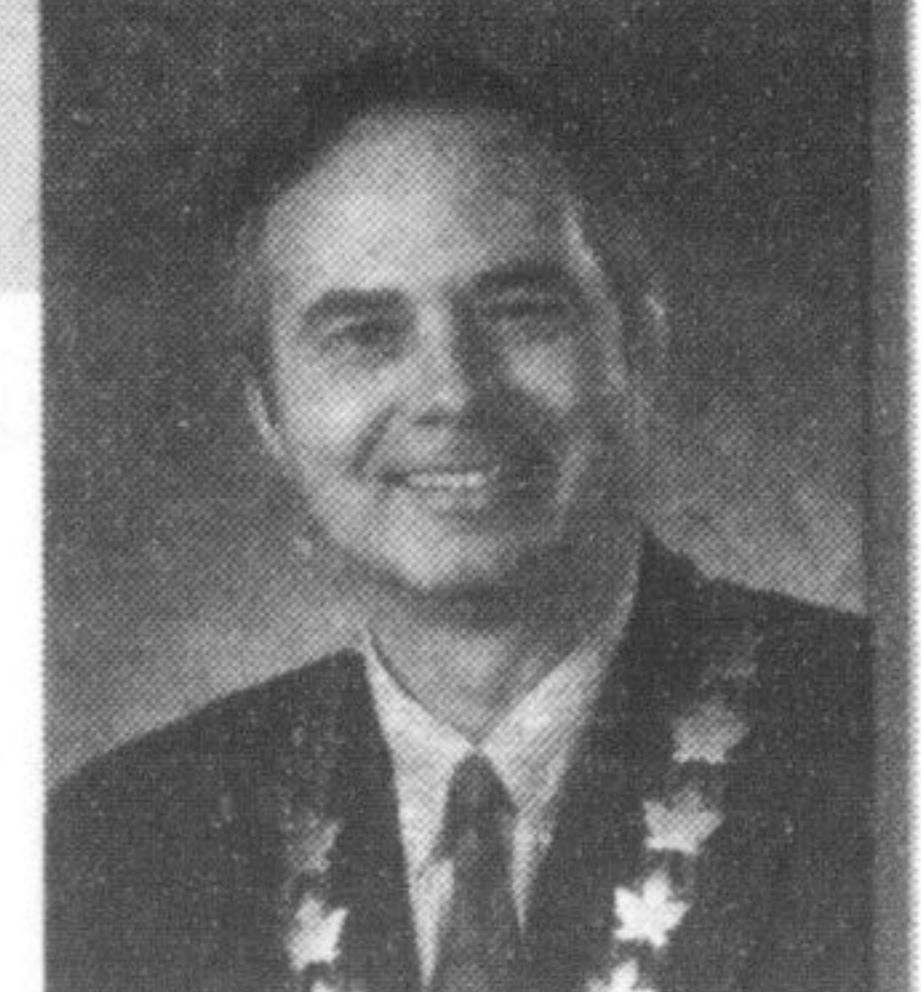

It takes less energy to recycle a pop can than it does to make a new one. I make sure all pop cans end up in the Blue Box.

—Slack Family

Fairness needed for fast growing Halton

The 2006 Census figures released last week by Statistics Canada show that Halton Region has experienced a population increase of 17.1% between 2001 and 2006. These figures justify our concerns that the Province must deliver the financial tools and funding commitments to accommodate the continued growth in Halton Region.

We have to continue to keep the issue of fairness for Halton in front of the Provincial and Federal governments. I urge you to visit Halton's website at www.halton.ca to find out more about the 'Fairness for Halton' campaign and to forward an on-line postcard to your local MP and MPP in support of the fairness initiative.

Gary Carr
Regional Chair
