there in good times and bad times —
A sampling of the work of Graham Paine,
Photographer of the Year.

Improving your quality of life.

Hearing loss is the 3rd most prevalent chronic disability among older adults and is superseded only by arthritis and hypertension. There has been great advancements in hearing aid technology and statistics show that 80% of clients are satisfied with their hearing aids when appropriately counseled. It is critical to identify and treat speech, language and hearing disorders as early as possible as these impact social, emotional and cognitive development.
