More Pond Myths Debunked

Water in the landscape is a lifestyle more and more people are choosing every day. Check back each week as we dispel some of the common myths surrounding this latest trend in gardening.

Myth 4: Ponds need daily water testing and corrective treatment.

Fact: If the pond is not chemically-dependent, there's nothing to test for. Mother Nature never tests her water. She doesn't use any store bought chemicals or pharmaceuticals. Neither should you for the most part. Stick to the program of ecosystem water gardening and let your pond grow healthy on its own. There is a difference between a chemically dependent pond and one that uses chemicals wisely.
