Home, Lawn & Garden

Relax in a garden that's more than just flowers

(NC)—We all need a sanctuary — a private place to revive, relax and reflect. With the lure of sunshine and Summer breezes, take it outdoors. A garden oasis is fun to create and adds a new living space to your home that the whole family can benefit from. The Home Depot Canada offers the following tips to help you build a tranquil green space:

Consider a theme.

Gardens offer endless possibilities in look, style and design. To help focus your efforts and set your garden apart, consider one of the following popular themes:

- An English garden has many flowers grouped in three or four colour schemes and separated with broad curves, with climbing plants on walls and trellises. Garden furniture, fountains and other décor are common features.
- In a Japanese garden, green plants are the norm with some colourful blooms reserved for the garden's entrance. Water should appear as part of the natural surroundings so a pond or stream, often with a bridge and island, is suitable.
- The wild garden uses a naturalistic technique featuring native plant species and wandering paths. It's easy to create habitats to attract local wildlife by adding a pond or birdbath. Restock the tool shed.

If you're planning on spending time in the garden,

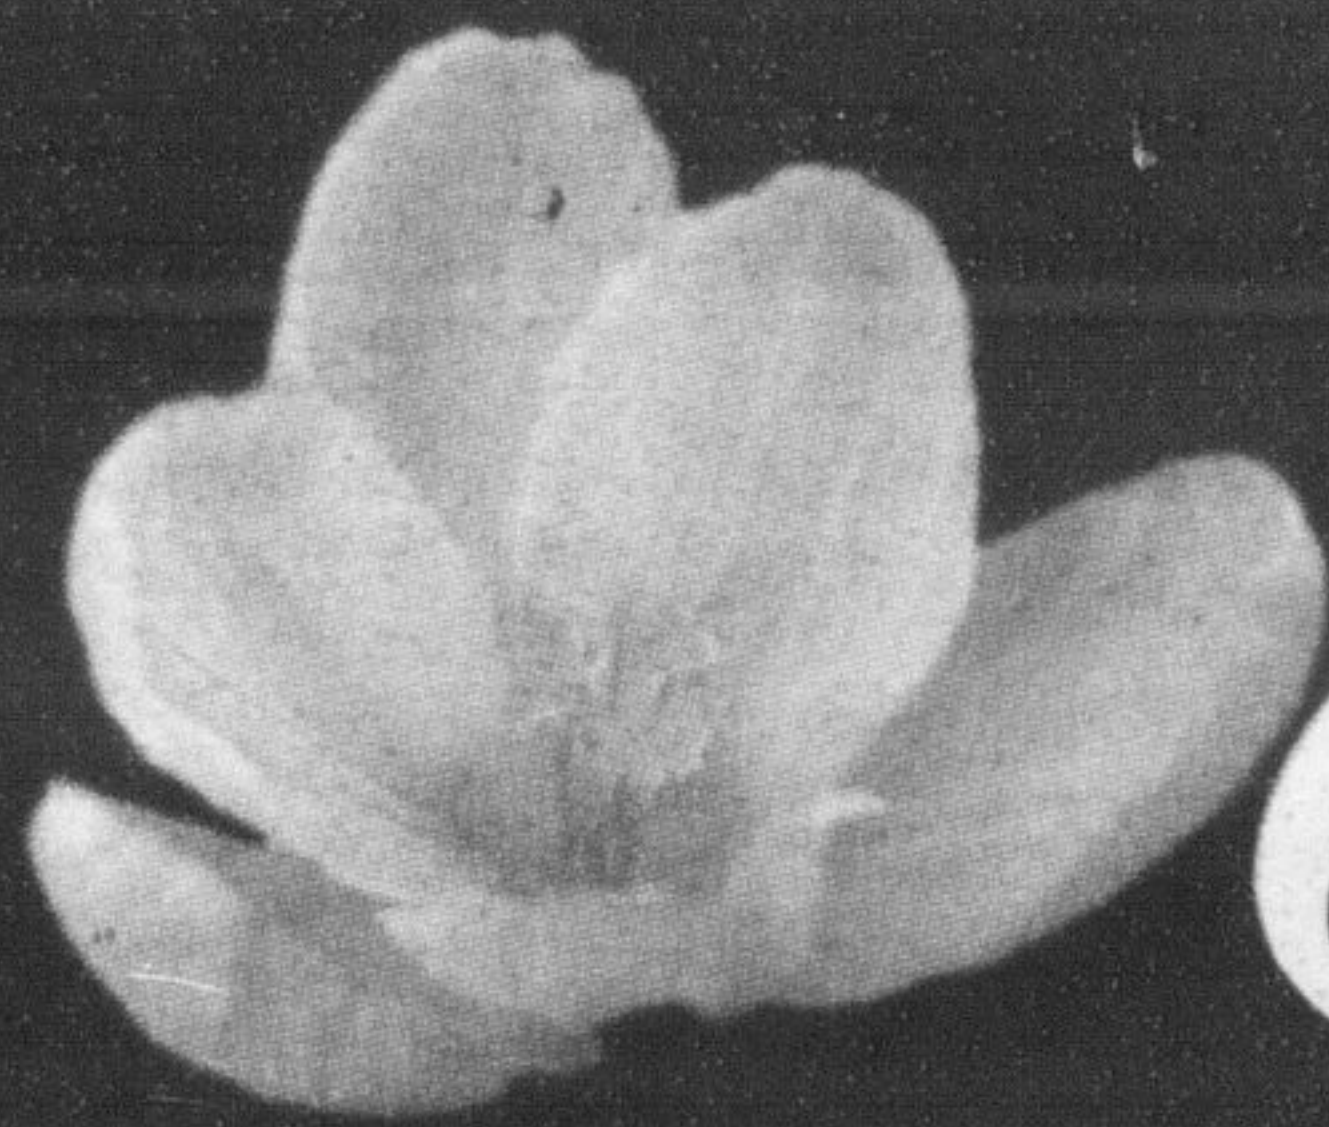

invest in tools that are comfortable to use, ergonomic and built to last:

- Choose hand tools like trowels, pruners and weeders with cushioned grips and made with rust-free metal.
- Be kind to your back by selecting larger tools such as rakes and shovels with ergonomic curves in the handles that help reduce strain on the body while increasing power.

Landscaping the area.

A great garden should be more than just flowers. Rocks, walkways, large plants and water all help improve aesthetic:

- A good garden can become great with the addition of pathways. Consider using wood chips, gravel or flagstones to mark the way and take into account your path's shape, size and location.
- The calming effect of running water makes it a popular addition for many gardens. There are now many products and tools available to help simplify building ponds, streams, fountains and other water features for gardens of any size.
- If help is needed, The Home Depot's Installation Services can provide design consultation and labour to landscape your space with shrubs, trees, accent lighting, waterfalls and more. You can find equipment and service to help build your dream green space at homedepot.ca or The Home Depot store in your community.
