Discovering Downtown
Milton

**CRAVE
systems**

Your Local Computer Source

Crave Systems will be celebrating their 1st Anniversary this October 1st, 2007 in their new location and will be celebrating their 6th anniversary in Milton. For the past 5 years, Crave Systems has grown from a home based business, to becoming a retail business on 153 Main Street East, to flourishing to their new home at 156 Main Street East in beautiful downtown Milton.

The new location at 156 Main Street has a rich history in downtown Milton. Residents in Milton may remember this store front as the old Roxy Theater, which opened in 1916 and featured seating for 342 people and a single screen. The Roxy Theater closed in the 1980's when Milton's new Premier 3 movie theatre opened. Crave System's owner and operator Chris Derksen, fondly recalls seeing several movies at the Roxy Theater including some of the original Star War movies, never dreaming that this was going to be the location of his future business.

Chris Derksen of Crave Systems has grown up and lived in Milton for over 29 years. He has worked in the IT industry as a computer technician and has been repairing and building computer systems now for almost 12 years. He and his wife Kristina, who was born in Milton, have 4 children together.

Crave Systems was first established to provide clients with custom built computer systems, tailored to exact needs and specifications.

Chris saw a demand for computer systems with unparalleled attention to quality, performance, compatibility and reliability. And it's in those systems that you'll find only the best computer hardware available on the market. Name brands like Asus, OCZ Technologies, Antec, Zalman, Lite-On and Western Digital. "We use Asus motherboards exclusively in all of our systems" explains Chris. "We are very pleased to be an authorized reseller and to be partnered with such excellent computer hardware manufacturers". But it is not only your average Home or Office PCs that

Systems design. They also specialize in mid to high-end gaming PCs. "We see a huge increase in sales when games like Bioshock and Supreme Commander are released" explains Chris. "It is definitely games like this that drive the hardware market".

Although Chris keeps a substantial display of inventory, there's even more that happens behind the scenes. Chris is kept busy repairing computer systems, diagnosing and replacing faulty hardware, maintaining or upgrading PC's, performing data recovery and ridding computers of adware, spyware, malware, and viruses. And this is an area which Chris is very proud to excel in. "Computer repair is a very specialized field, and one that a computer owner should take seriously" Chris says. "To the customer it's like finding the right mechanic. One that won't sell you parts you don't need, or charge you to fix something that's not broken. You have to be honest with the customer to establish trust, which I believe we've done very well".

It's not only complete systems you'll find at Crave Systems. They also carry a broad range of internal parts and peripherals including motherboards, video cards, sound cards, hard drives, optical drives, and monitors. "We'll always do our best to get anything you need," pledges Chris.

So if you've got a problem with your current computer system, looking to upgrade it, or if you happen to be out shopping for a new one, stop by Crave Systems. A local choice that will never leave you disappointed. In fact, you'll only be left Craving more!
