Give your deck that popular wet finish look

• from EXPAND on page C11

outdoor living spaces with Sico's new solid exterior wood stain.

"As a brilliant display of rich shades, our solid stain is a stunning match for your most creative ideas and colour combinations," added PÉpin. Sico's solid stain, available in a wide range of warm colours, can add balance, softness and natural charm to your outdoor spaces.

Semi-transparent stain

New Sico's semi-transparent stain brings out wood's natural texture and grain. It also provides the kind of durable protection that is so essential to the lasting enjoyment of your outdoor structures.

Sico's semi-transparent stain is ideal for bare wood surfaces or those that are already stained with the same kind of stain in a sim-

ilar or slightly lighter shade," she added.

Translucent wood finish

Ideal for bare wood surfaces, Sico's new translucent wood finish also refreshes the appearance and protection of structures that have been previously stained with a product of a similar type and colour.

"Our new translucent wood finish brings out the wood's texture and grain to preserve

its natural elegance. Its rich finish is as protective as it is eye-catching," PÉpin added.

The cream of the crop of Sico's stain line, the new translucent wood finish offers unparalleled beauty and richness. "Its look is really exceptional," she added. "It gives your deck that popular wet look finish." More information and advice on wood stains and staining can be found at www.sico.ca
