

Shoot-out heroics give atom selects tournament title

Jake Valsamis scored in a shoot-out while teammate Nick Haringa stopped every shooter he faced as Milton's atom selects edged Salmon River 2-1 to clinch the championship at the Buffalo Pepsi Tournament.

Salmon River — which had outscored its opponents 23-3 heading into the final — struck first and held on to that lead until Andrew Boyle converted Jeff Gorman's pass from behind the net with six minutes to play, forcing overtime.

Eight minutes of four-on-four overtime didn't produce a winner so the teams went to a shootout, where Valsamis scored the only goal, lifting the puck over the goalie's shoulder for the winner.

Milton opened the tournament with a 2-1 win over Depew, N.Y. — in which Ethan Doiron made 25 saves for the Winterhawks. Gorman and Boyle each had a goal and an assist.

Gorman added two more goals in a 4-1 win over Fulton, N.Y. Eric Wiebe and Tyler Playter had the other goals, while Haringa was between the pipes for the victory.

Needing a win against Bradford to secure a spot in the final, Milton trailed 3-1 late in the second period. They turned things around as Sykes and Playter scored a minute apart to tie the game. Alex Orosz would

Minor Hockey

score the winning goal and Playter's third goal of the game sealed the victory.

Bantam selects reign supreme

After being finalists at their previous two tournaments, the Milton Bantam Selects defeated Pickering 5-2 to claim the championship at the Milton March Madness Hockey Tournament.

Led by Cam Stockall's six points and five each by Ross Morgan and Justin Walter, Milton won five straight games to take the title. Goalies Alex Kerr and Brandon Bodiam

each recorded a shutout in the tournament.

After getting their first win by forfeit, Milton topped Kingston's Frontenac Flyers 7-2. Morgan Christmann was named the team's player of the game. Milton then blanked Pickering 4-0 with Liam Venerus picking up MVP honours. Alex Kerr took home player of the game honours after shutting out Richmond Hill in a 5-0 Milton win.

Morgan won the player of the game award in the championship game.

Thomas Chuchmach scored in all four tournament games and each forward line contributed points in each game. The defence also chipped in with three goals.

NOTICE OF PUBLIC INFORMATION CENTRE

Skyway Wastewater Treatment Plant Expansion Municipal Class Environmental Assessment Study

The Study

The Regional Municipality of Halton recently completed the 2008 South Halton Water and Wastewater Master Plan Update. This Master Plan Update identified several infrastructure projects which are required to service growth in the approved urban areas of Burlington, Oakville, Milton and the Halton Hills 401 Corridor to the year 2021, including a need to expand the Burlington Skyway Wastewater Treatment Plant by 2013 (refer to map for Study Area).

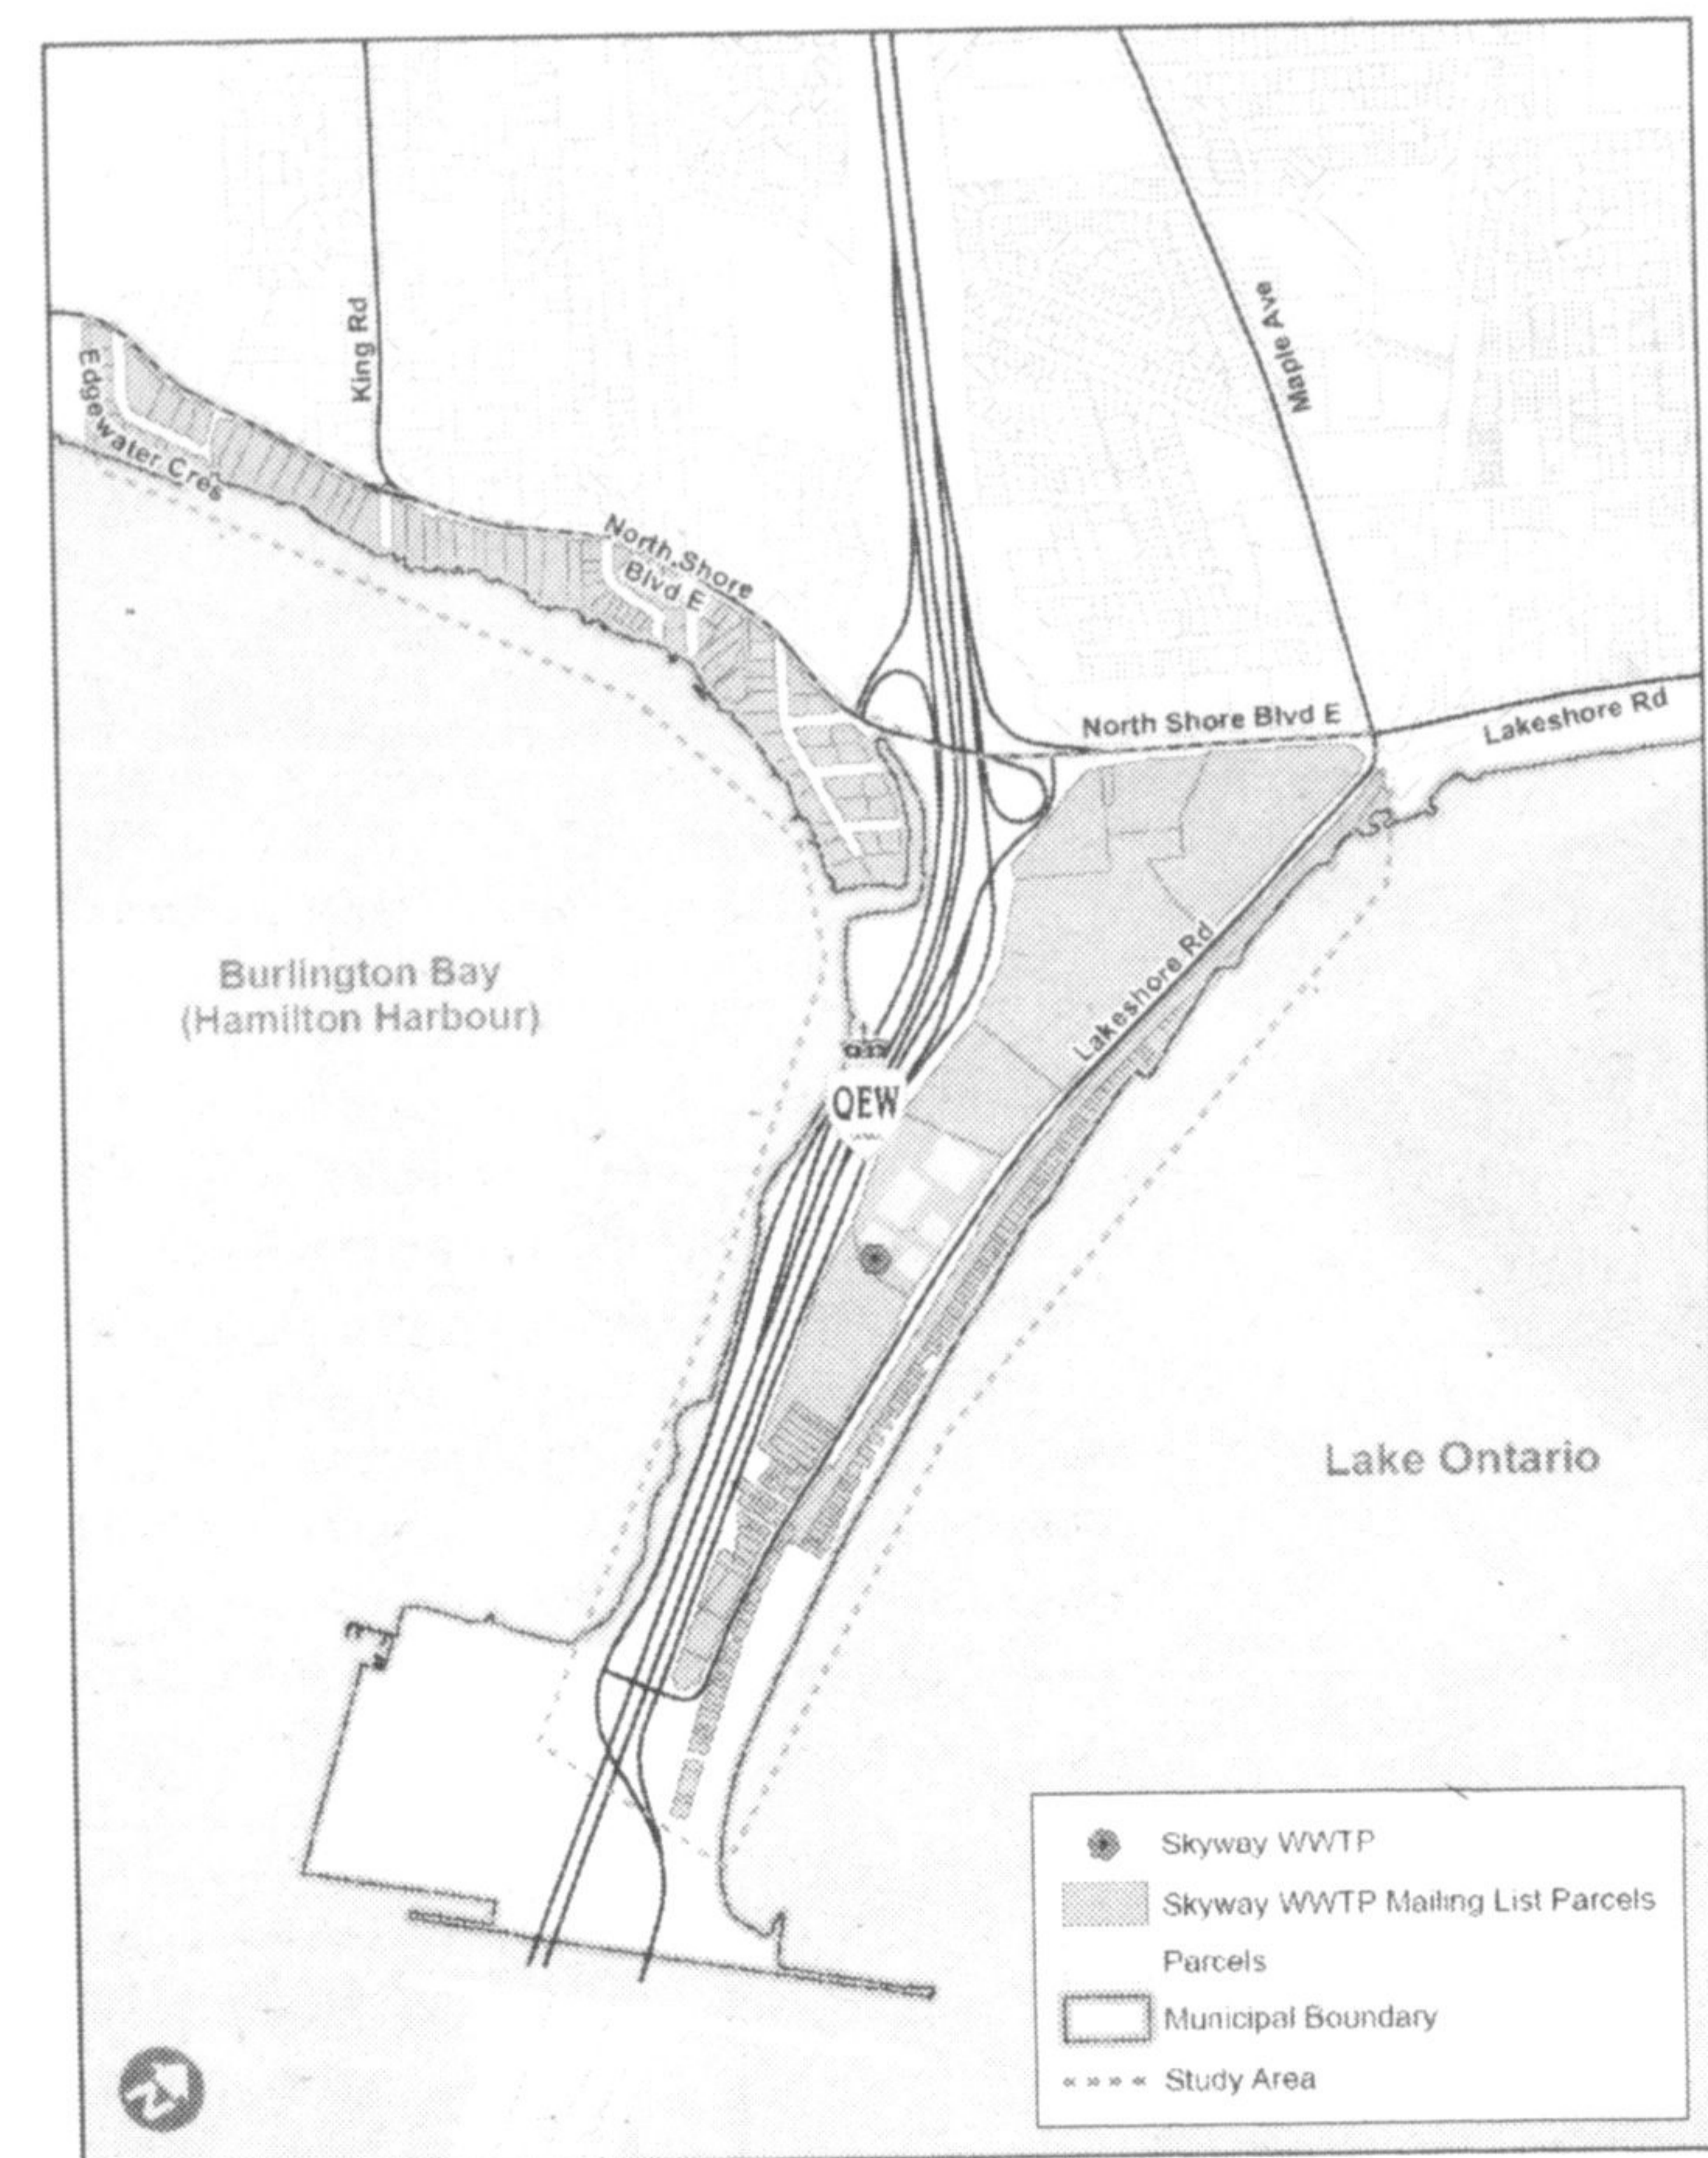

The Process

As a part of the study, a Public Information Centre (PIC) is planned to provide the project objectives, an introduction to Municipal Class EA process, the status of this EA study, the project consultation plan, and an overview of the existing plant in terms of conditions and performance. Furthermore, the details of the proposed Decision Making Approach, Long List of Alternatives (including the option of relocating the outfall to Lake Ontario), Screening Criteria, Development of Strategies, and Detailed Evaluation Criteria will also be presented for public and interested parties' consultation. Representatives from the Region and its consultants will be present at the PIC to answer questions and discuss the next steps in the study. The PIC is scheduled for:

Date: Thursday, April 16, 2009
Time: 4:00 pm to 8:00 pm
Location: Burlington Senior's Centre
 2285 New Street (Centre Park)

You are encouraged to attend the PIC and provide your comments so that they may be included in the study. Comments received through the course of the study will be considered in finalizing the recommended design concepts for the plant expansion, as well as the mitigation measures. Comments and information regarding this project are being collected to assist the project team in meeting the requirements of the Class EA process. With the exception of personal information, all comments will become part of the public record.

Please contact either one of the following project team members if you have any questions or comments, wish to obtain more information on the project, or if you would like to be added to the mailing list:
