

# CIBC to open third Milton branch

CIBC has announced it will open a 6,500-square-foot branch at First Capital Realty's commercial centre development at the northwest corner of Bronte Street and Derry Road.

It will be one of two banks at the new

retail development, along with RBC.

The new CIBC bank branch will be open six days a week and will include a drive-thru bank machine. It will be the third CIBC branch in Milton when it opens in early 2010.

## NOTICE OF COMMENCEMENT

### BIOSOLIDS MASTER PLAN CLASS ENVIRONMENTAL ASSESSMENT STUDY

#### The Study

Halton Region has initiated a comprehensive Master Plan for the management of biosolids generated by the Region's wastewater treatment plants (WWTPs). The seven WWTPs owned and operated by Halton Region currently generate approximately 11,000 dry tones of anaerobic biosolids per year. In 1999, a Biosolids Management Strategy was undertaken which recommended program diversification and flexibility to address issues related to biosolids management. Since that time there have been additional changes in the regulation of biosolids management, as well as biosolids treatment technologies. Given these changes, it is an appropriate time for Halton Region to undertake a Biosolids Master Plan that would consider specific program needs and long term sustainability.

The primary purpose of this study is to evaluate alternative technologies and biosolids management options and to recommend a strategy that responds to the current and future challenges to the year 2031.

#### The Process

The study is being conducted in accordance with the requirements for Master Plans under the Municipal Class Environmental Assessment (EA) (Municipal Engineers Association, 2007). The Class EA process includes public and review agency consultation, an evaluation of alternatives, an assessment of the potential environmental effects of the proposed projects and the identification of reasonable measures to mitigate any adverse environmental impacts.

The intent of the Master Plan is to fulfill the Class EA requirements for Schedule B projects (those having a minimal environmental impact and require only a screening), as well as completing Phases 1 and 2 of the process for Schedule C projects (those with a greater degree of environmental impact). Projects identified as Schedule C undertakings will proceed to Phases 3 and 4 of the Class EA process following the completion of the Master Plan, which entails additional study and consultation.

A vital component of this study will involve consultation with interested stakeholders, including the public and regulatory agencies. Two Public Information Centres (PICs) will be scheduled during the study to provide background information and to present the preliminary preferred strategy and the recommended Master Plan strategy. Details of the PICs will be published at a future date.

Information updates on the Biosolids Master Plan will also be posted on Halton Region's web site at: [www.halton.ca](http://www.halton.ca).

Please contact either of the following project team members if you have any questions or comments, wish to obtain more information on the study, or if you would like to be added to the mailing list to receive future notifications for the study:
