

Town staff support new highway

Town staff are in support of a potential new highway corridor that will stretch from York Region to the future Tremaine Road/Hwy. 401 interchange.

Dubbed the GTA-West Corridor, the Province's preferred route begins at Hwy. 400, continues north of Brampton, proceeds just south of Georgetown and ends just west of Milton at Tremaine Road and Hwy. 401.

The corridor will also connect with the Hwy. 401/407 interchange east of Trafalgar Road.

"Milton staff fully support this proposal as it greatly benefits the Town's future land use planning," states a report presented to the administration and planning committee last week.

However, Halton Hills town council has raised environmental and agricultural concerns about the corridor that will cut through rural Halton Hills.

The results of the first phase of the environmental assessment (EA) were recently presented during a Municipal Advisory Group Meeting, attended by Town staff.

The second phase of the EA has yet to begin.
