

Consumer Buying Tip:

3 letters that could save your life: ESC

(NC)—Electronic stability control, or ESC, compares the direction of your steering wheel with the direction the vehicle is going. When they're not the same, ESC automatically activates the brakes on one or more wheels and can also reduce engine power to help keep the vehicle under control and heading in the right direction.

Transport Canada has introduced a new motor vehicle safety standard that will re-

quire ESC on most new vehicles built after Sept. 1, 2011. The department's website, www.tc.gc.ca/ESC, contains more information on ESC, as well as lists of vehicles that already have it.

2011 is Canada's Year of Road Safety so why not re-think road safety.
