**Newest 'mobile app' matches paint color instantly**

Now when decorating, you can act upon whatever inspires you in the moment.

A major paint company is giving us an easy-to-use, digital application to record, identify, and match any favourite color, on the go. It might be the blue sky in a park, a vivid red sweater, or an amazing shade of lavender fabric in a flowing curtain. If you want that color exactly, it can be yours. This newest app will match it immediately to just the right paint color.

Called ColorSmart by Behr Mobile Application, homeowners can download the touch-and-tap tool, free of charge from the Android Market and Apple iTunes App Store. For more information on the application and how to use it, visit behr.com/colors-martmobile.

Here's how:

- **Explore Color**—Browse the range of more than over 2,000 color possibilities. Once a color is selected, you can further coordinate or preview it in a room image.
- **Photo Match**—Take a photo, or use an existing photo from your personal collection. Tap on an area in the photo and the application will pull up the three closest matching paint colors.
- **Preview**—Test your color choice by virtually "painting" the walls, trims and accents on room images. Zoom in to see details or remove a color and add another until perfect. You can also use the 'favourites' feature to save your favourite color combinations.
