She was dressed, as perhaps you see by the papers, 'exceeding plain,' in bombazine with a little shabby musiin collar, dyed Leghorn hat, ar I leather shoes."

Famous Bank Vaulte Specially constructed vaults have been provided to house the gold re serve of France. These vaults are in a big chamber, covering two and half acres, 200 feet below the earth's surface. Above the ceiling is first feet of water and then 50 feet of solid rock. This safety deposit was build since the World war. A place was planned which would not only be safe from bombs but where the bank force guarding it would be safe from gas attack. A supply of fresh air is drawn into the vault chamber through a secret source. The fact of the vaults being under water is explained as pulting from the flow of a river be neath the city of Paris. This was discovered when the opera house was built, just before the War of 1870.

Britain's Varied Climates There is no other country of similar size which has so many climates Great Britain. A man traveled in Feb ruary from Aberdeen down to London and next day went on to Falmouth Around Aberdeen the country was deep in snow. The Cairngorms were absolutely Arctic, and on Deeside curiing was in full swing. Forty-eight hours later, at Falmouth, the sun was hot, daffodils and other spring flowers were in bloom, and it seemed like another world. From northern Porthshire ur to Braemar is a great stretch of country where snow falls at the end of October and as a rule lies until the following March.
