It softens and forms Women in Andorra Work a glass only in the hottest of flames. Yet it is used to make the spiral springs used as delicate balances in certain laboratory research.

Such quartz spiral balances are used at the Forest Products Laboratories of Canada. Department of the Interior, by workers in the Pulp and Paper division, Montreal, for the investigation of the relationship between water and paper-making pulps. The quartz is melted into a flame of oxygen and acetylene and drawn into long threads about the thickness of a hair. By the aid of a somewhat less intense flame, these threads are coiled into delicate springs about half an inch in diameter. Enclosed in glass apparatus from

Cattle Graze on Asparagus Asparagus, the highly prized vegetable for which Americans at times are forced to pay high prices, grows so freely in the wild state in Russia the cattle graze on it, says the Washington Star. The plant also grows wild on the southern coast of England. There are some 150 known varieties of asparagus, the most common being the so-called esculent asparagus, which is used for table purposes. It has been under cultivation for more then 2,000 years.
