Canadian Spinning Wills, MILTON.

#### Overflowing milk pails

Opring is the season of overflowing milk pails. Every pound of this huge supply has to find an cutlet. Months of planning must precede high production and months of selling must follow so that cash for the spring milk crop can flow back to the producer in an uninterrupted stream.

To help this along, Borden advertising and selling effort are aggressively pushing every opportunity to find and develop new markets for milk and milk products. Borden research is dedicated to increasing the usefulness of the nation's basic food. In flush season and out, salesmanship and research are the

twin forces that keep milk moving from farm to household.
