

Propane hazardous in appliances

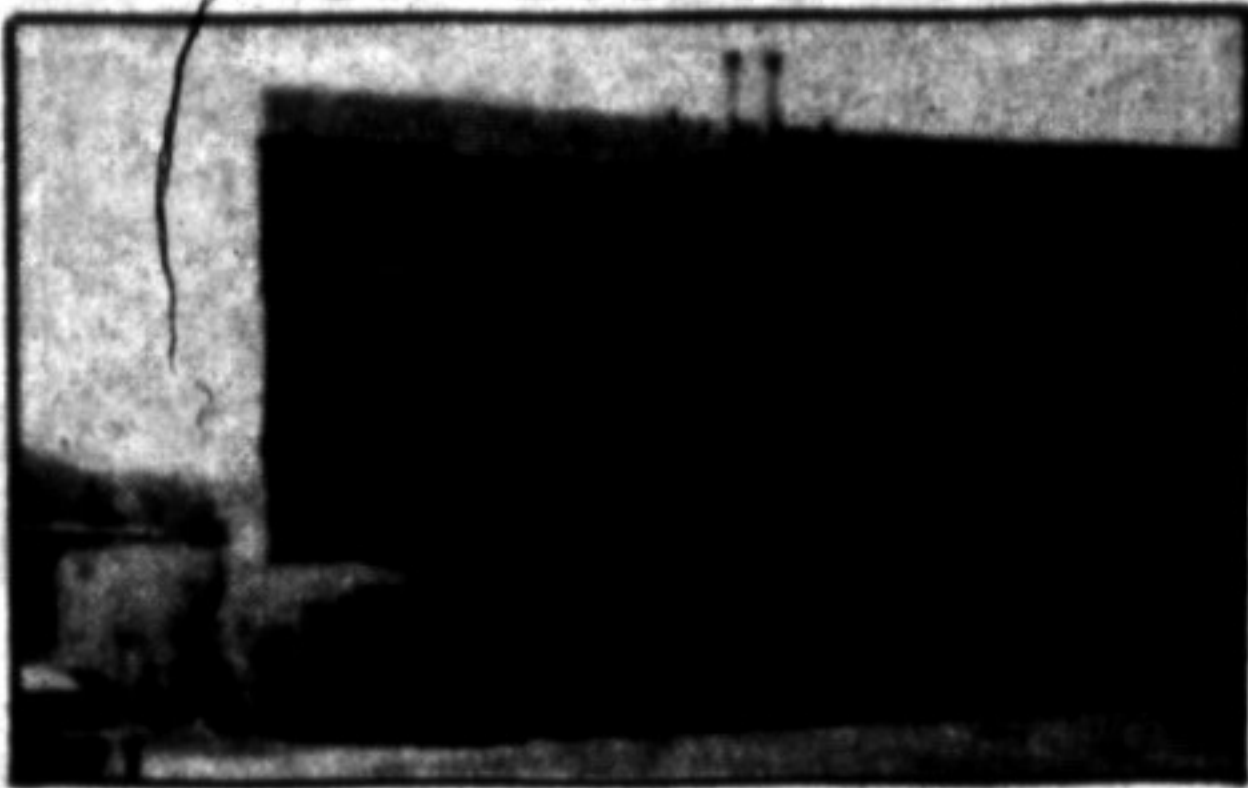

Experts with the Ontario Ministry of Consumer and Commercial Relations Fuels Safety Branch offer the following tips for the safe handling of propane barbecues.

• Play it safe. Test your barbecue for leaks at the beginning of every season. Before connecting

the barbecue to the propane cylinder, make sure the rubber O-ring or seal on the fuel-line connection is in good condition.

• When it's time for a refill, drive directly home with the full cylinder instead of taking the time for other errands.

CHRISTIE & WOODS Real Estate Ltd.
