

New booklet explains free trade to small business

Answers are in sight for small and medium-sized business operators who are looking for ways to take advantage of the free trade agreement. These answers can be found in a new publication called the Free Trade Handbook published by the Federal Business Development Bank.

As the only guidebook on the market today to feature all federal and provincial trade assistance programs, the handbook is an indispensable reference source for

anyone considering expansion or export to the United States.

As well as providing data on assistance programs, the 305-page document contains valuable sources of information and key trade contacts for entrepreneurs. It lists information on Canadian trade representatives in the U.S. and the U.S. Consulate General Service in Canada, export/import associations, glossary of trade and export terminology and a free trade tariff removal

schedule on 80 key industrial sectors.

According to Claude LeBon, FBDB vice-president for management services, "there are over 250 assistance programs available to businesspeople wanting to trade with the United States. It would be impossible for any one entrepreneur to research all of these programs. So, as part of our mandate to promote the growth of Canadian small businesses, we gathered all this information into one easy-to-use reference book. This docu-

ment is designed to help small business people with export decision-making."

Sold for \$10.95, the handbook is available in English and French, and can be purchased at all FBDB branches and CCH Canadian offices.

The Free Trade Handbook is the result of a unique co-publishing project between the Bank and CCH Canadian Limited, a well-known private sector publishing house specializing in the field of business publications.
