Barbara Janzen, R.N.
Diet Center Counselor

Do You Often Quickly Regain Weight You Have Lost?

You might be surprised to learn that on the average less than ten percent of all dieters maintain their weight loss for three years. This is due to the fact that most dieters are treating the symptoms of being overweight instead of working to alleviate the underlying problem.

At Diet Center we enjoy a much higher level of long term success than the national average. The reason? We teach you how to adapt your lifestyle to ensure that the weight you lose with us never returns. Call today and find out how Diet Center can help you lose weight and keep it off forever.
