### Out on a limb

Entertainment was the key to the success of the annual Mayfair at Halton Waldorf School on Saturday. There were plenty of amusements for kids including this swing which served triple duty as (from left) Tara Hogeterp, Phillip Hogeterp and Jevan Dawe all piled on.

## Blue Jays treat kids to free game

Twenty-five Milton area children will be treated to a Toronto Blue Jays game thanks to the Variety Club, the Ministry of Community and Social Services and the Jays.

The group, selected by the Milton Children's Youth Council, will watch

the Jays battle the California Angels on May 20.

They will be among of 5,000 other children from around the province to converge on the SkyDome in this, the

eightth consecutive year for the trip.

The seats were donated by the ball club, transportation is being covered by the Variety Club and the ministry is co-ordinating the event.

### Dance for funds on June 16

For the first time in north Halton, residents will be able to dance for the benefit of developmentally handicapped persons.

The North Halton Association for the Developmentally Handicapped will hold its first fund-raising dance on Saturday, June 16 from 8 p.m. to 1 a.m. at the Royal Canadian Legion in Georgetown.

The cost is \$15 and the dance includes food, prizes, a D.J., and a cash bar. For ticket information, call Kelly at 877-5557.

In addition to dance participants, the fund-raising events co-ordinator is looking for volunteers to assist in organizing.

### Heart worm is canine killer

Your best friend's life could be at risk this summer and you could do something to save it.

Dr. Larry Wilder, a spokesman for the Canadian Veterinary Medical Association, warns that heartworm disease in dogs is on the rise.

The disease is transmitted by contaminated mosquitoes that leave behind microscopic worm larvae with their bites.

The larvae migrate through tissue for several months and eventually travel to the heart where they mature into worms.

The worms can impair blood flow and damage major organs and in some cases the condition may be fatal.

Dr. Wilder suggests dog owners see their veterinarian for information on preventative medicine and other methods to protect both your dog and other dogs in the area.
