## EDITORIAL COMMENT . . .

Since 1985 when we became Bruce Hood Travel there have been major changes in the airline industry — with air carriers closing down the foremost item — remember Mohawk, Alleghany, Pacific Western, Quebecaire, Eastern Provincial, WARDAIR, Northeast, Eastern, and on and on to more recently PAN AM.

What's next? — with "open skies" upcoming, will we see our two major carriers merge or each tie in with a major US company. I suspect the latter. Let's hope it guarantees good economical service for the business traveller, whichever way they go. Close to \$225 million losses in the first nine months of 1991 by the two carriers indicates something will happen — perhaps Air Canada with United & Canadian with American to become Air Can United & Can Am Air!

**OUR TWICE DAILY TICKET DELIVERY** system/including boarding passes where available has worked very well. Combined with a direct phone line and fax at her elbow allows our corporate travel specialist Sue to give priority service to everyone!

**AMTRACK** will test a 125 mph train on the New York-Boston corridor. If successful they expect ridership to increase 10 fold to 3.5 million passengers within 5 years. Where will that leave the air shuttles?

**AIR CANADA SERVICE TO GERMANY GETS A FACE LIFT.** Air Canada is completely relaunching its services to Germany, including the introduction of daily non-stop flights between Toronto and Frankfurt beginning May 17, 1992.

**BRING YOUR AEROPLAN CANADIAN PLUS,** or other mileage plan travel credits to us to make your travel plans. As regular business travel clients we are delighted to make these arrangements for you and your family.

**Cheryle Greenly**

Serving the needs of many, local corporate and vacation travellers, Cheryle is a veteran travel consultant who has a regular following she looks after "pronto haste". Give her a call!
