HAVE A SPA FOR YOU!

If you have the space, Beachcomber has a model that will fit right in. Portability and ease of installation have made Beachcomber the preferred choice of discriminating spa owners. For instance, the luxurious, full-sized Model 680 is also available as a two-piece model, specifically designed and manufactured in two sections that can easily be carried through most doorways and stairways and assembled on-site. This is an important consideration for those living in townhouses and apartments, where access is restricted, but the features and roominess of a full-sized spa are desired.
