

Teens unscathed after car crash

Two Burlington teens were lucky to escape serious injury when their car hit a tree and landed on its side on a rural road Thursday afternoon.

The 17-year-old driver lost control of the car while swerving to avoid hitting an animal on No. 10 Sideroad, west of Fourth Line, regional police said.

The eastbound red Lincoln Town Car, which was destroyed in the accident, travelled along the north ditch a short distance before hitting the side of a large tree and coming to a stop on its side.

Milton firefighters were called to the scene with the possibility that the occupants were trapped in the vehicle. But a passing motorist assisted the two youths out of the car, which was hidden by foliage.

Ray Plant, who lives just down the road from the accident site, was taking a leisurely ride on his motorcycle when he noticed what he thought was a fallen tree.

"I thought the tree was down," he recalled. "I went right by and I didn't see the car there. Then I looked back and saw the car and I stopped. They were trapped inside and I helped them get out."

This red Lincoln Town Car was hidden under the trees after the driver lost control and drove into the ditch on No. 10 Sideroad Thursday.

The youths, who were wearing seatbelts, exited the vehicle through the front driver's side window and climbed over the roof to the ground. They suffered minor injuries. No charges have been laid.

At \$49.90*
it's putting the brakes on the competition.

Compare a Genuine Toyota Brake Pad Kit to other brake pad kits.

When it comes to helping you make a safe stop, nothing outperforms Genuine Toyota Brake Pads. Just compare these quality features to those of the competition:

- ✓ Brake pad materials are matched to the particular characteristics of each Toyota model ensuring maximum braking efficiency.
- ✓ Brake pad backing plates are precision manufactured for each model to control excessive pad movement, noise and wear.
- ✓ Unlike most other kits, our price includes all new mounting hardware - pad support plates, anti-squeal shims and anti-rattle springs.

When you put all these superior features together they add up to brake pads that last longer and perform better. So don't be misled by claims that one brake pad is as good as the next. Make a quick stop at Burlington Toyota and ask for the genuine thing.

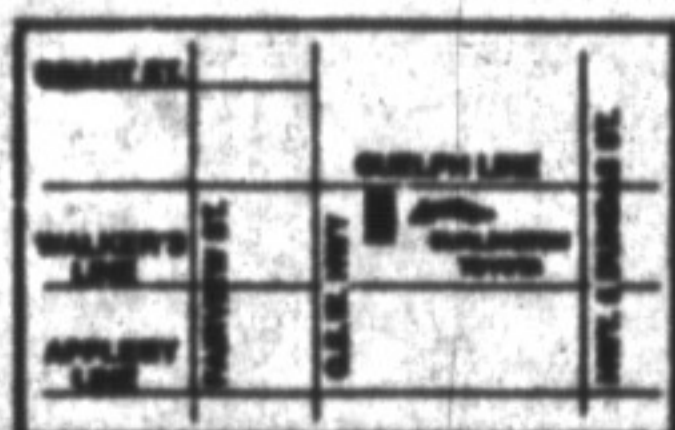

* Most models: Labour and all taxes extra. See Burlington Toyota for details.
