HERE'S WHAT TO LOOK FOR WHEN BUYING YOUR CAULK

When it comes to home improvement, few products are more versatile than caulk. It's useful when doing carpentry, painting, installing tile, putting up sheetrock... just about any project.

But finding the right caulk can be confusing. To simplify the process, here are some helpful hints from the experts at the Rohm and Haas Paint Quality Institute:

Read the label on the caulk tube.

It will tell you specifically where the caulk can be used. The label will also tell you whether or not the caulk can be painted, an important consideration depending on the application. While many silicone caulks can't be painted, water-based caulks can be coated with all types of paint.

Invest in quality.

No matter what type of caulk you buy, it's wise to purchase a top quality caulk or sealant. Although you may

spend 50 cents to a dollar more per tube, higher quality caulks tend to be more flexible, have better adhesion and are more durable. They also stay attractive longer since they contain special additives that help resist dirt pickup and mildew growth. By investing in a high quality caulk, you won't have to recaulk as often, saving you time, effort and expense in the long run.

Pay attention to the warranty.

This is a great indicator of the quality of caulk you are buying. Manufacturers of quality caulk offer lengthy warranties on their products, the longest of which will be on their very highest quality caulk.

For general interior and exterior use, choose a water-based siliconized acrylic caulk.

While some caulks are designed for very specific applications, a high quality siliconized acrylic caulk will

provide superior performance almost anywhere — from kitchen and bath where it is wet, to the home's exterior, where the caulk is subjected to moisture and temperature extremes. Siliconized acrylic caulk offers excellent adhesion and durability. It is easy to use, is paintable with either oil or latex paint, and has low odor. In short, it's a great choice for most applications around the home, offering the peace of mind that you won't have to repeat the job anytime soon.

When in doubt, ask for advice.

If you are uncertain about which caulk to buy, or if you need caulk for a specialized application (e.g., a roof repair or around guttering), ask the experts at your local home center, hardware store, paint store or decorating center. They'll help you select the quality caulk that's best suited for your needs.

WATCH YOUR WASTE MILTON!

Hurry And Order Your Home Composter Before September 30th.

The TOWN OF MILTON is now accepting applications on a PRE-ORDER BASIS, for the "THE EARTH MACHINE" home composter for residents living in Rural and Urban Milton. After the Sept. 30, 1993 application deadline, composters will be available in about 3-4 WEEKS.

Applicants will be NOTIFIED BY MAIL when their composters are ready for pick-up. A sample unit is available for viewing at Town Hall.
