

# Drugs suspected target in break-in cut short at rural veterinary clinic

A break-in at a veterinary clinic in Milton was discovered by police officers responding to an alarm last month.

The attending officers found the rear door forced at the Brookville Veterinary Clinic at 11280 Guelph Line about 2:30 a.m. September 20.

It was apparent whoever broke in spent time trying to disable the alarm system and prevent the dogs inside the building from causing any problems.

A few drawers were searched

## Flu shot needed for some people

Older people and other individuals with various medical conditions should have a flu shot to get them safely through the fall and winter months, says the Ontario Medical Association (OMA).

Those who fall into the high-risk categories are seniors — people 65 or older — individuals suffering heart conditions, chronic-lung conditions such as emphysema, asthma or bronchitis, diseases such as diabetes, cancer, anemia, renal or sickle-cell disease, immunodeficiency/suppression and children on long-term ASA treatment.

In Ontario, more than 7,000 people are admitted to hospital each year as a result of complications from getting the flu, the OMA said. Pneumonia is the most common complication of influenza. Others include kidney failure and a variety of nervous system disorders. Seniors comprise 50 per cent of those admitted annually and 85 per cent of the more than 300 deaths a year in the province attributed to influenza.

Those individuals who fall into high-risk categories can obtain a flu shot free of charge.

Entries such as these always cause concern. Drugs are frequently the target, but compounds intended for animal use can have serious consequences for humans.
