## Another day at the office

The nice weather made this job more bearable this week as these window washers hung around to get some cleaning in before winter at Millside Drive's Village Parc condominium.

## Info sessions on asthma

Experts say ten to 20 percent of children suffer from asthma. That's three to six students in every 30-person classroom.

There's no cure for asthma but it can be controlled. Most young asthma sufferers participate in sports and attend school regularly, leading normal lives.

That's why the Halton Lung Association has partnered with the Halton Board of Education, and Astra Pharma, to offer The Challenges of Asthma, a free-of-charge information session on asthma.

One of the first things learned is that most children with asthma are okay most of the time, although the disease is persistent and without proper, regular treatment, can be

dangerous. The Challenges of Asthma will take a workshop format to serve as a guide to teachers, coaches, day care workers and parent who deal with asthmatic students. It will look at daily asthma management, current, applicable public school board procedures, asthma's relationship to exercise and gym class, the handling of acute attacks including anaphylaxis shock and the many drugs associated with asthma.

The two-hour workshop starts at 7:30 p.m. Monday, September 26 at the Halton Board of Education's administrative headquarters, the J.W. Singleton Centre at 2050 Guelph Line, Burlington. For registration call the Lung Association, Halton Region at 847-1033.

# Milton students fare well in music
