

1996 LEAP YEAR ...

1 extra day to

- walk the dog
- take your family on a picnic
- get those pesky wisdom teeth out and, maybe,
- put a real financial plan in place.

Let us show you some RRSP investments that benefit from lower interest rates!

Not everyone likes low interest rates. Certainly not those who invest in short term interest rate vehicles, where money is effectively "loaned" to a financial institution and tied up for years earning a fixed return.

Now is the time to "leap" out of the fixed interest rate pond into some quality investment funds. For RRSP investors in some bond and income funds, lower interest rates have been a friend, not an enemy.
