

Hornby WI

Volunteer is guest

Hornby Womens Institute meeting was held on February 8 at the home of Mrs. C. Wrigglesworth with six members and seven visitors present.

Mrs. C. Patterson, president opened the meeting with opening ode and Mary Stewart collect. Mrs. L. Sampson read the minutes of the last meeting.

Correspondence consisted of a letter from the District President, a notice concerning officers Conference May 1, 2 and 3 at the University of Waterloo and a Geneology Society meeting at Emmanuel College, Erindale, on May 18, 19 and 20 involving local history.

Mrs. R. Wilson gave a report on the pornography meeting attended in Georgetown. Roll call—name a first aid article you carry in your purse was answered.

Mrs. C. Wrigglesworth was convener of Public Relations program. Mary Little, a volunteer from Georgetown Cancer Society, showed a film stressing early medical attention if you have a lump or sore that does not heal.

It is felt that 80 per cent of cancer is related to our environment and is therefore preventable. Skin cancer is known to be related to excessive exposure to the sun and lung cancer is definitely related to heavy cigarette smoking.

The Cancer Society has home nursing service available from Society funds for 2 weeks and volunteer drivers for patients who need treatment outside the home. The motto "A Merry heart kills more germs than medicine" was given by M. Wrigglesworth.

Campbellville WI

Propane protest

Approximately 40 local residents attended an open safety meeting sponsored by Campbellville Women's Institute at Masonic Hall Feb. 1.

Mrs. J. McCall presided at the meeting which attracted three

members of Flamborough Residents Against Propane (FRAP). An update was provided of their protest of a propane station to be located on HWY. 6 which they claim will cause dangerous truck traffic in the area.

This will also mean the transportation of propane tanks via Hamilton railway line to Guelph Junction then transfer to the CPR line which passes through our village.

It was pointed out that a pipeline already in place could be used to convey propane to Shell, but at a much higher cost.

A discussion followed a film presentation.
