

### Milton man wins \$100,000 playing ENCORE

Milton's Dexter James recently won \$100,000 in an ENCORE draw. Dexter James purchased his winning ticket from KSRG Enterprises on Main Street in Milton. ENCORE can be played in conjunction with most lottery games for an extra \$1. Ontario lottery players received \$1.7 billion in prizes in the 2011/12 fiscal year.

## JOE FELT IT WAS TIME TO CONSIDER RETIREMENT LIVING:

Now he enjoys three nutritious meals daily. He doesn't concern himself about doing chores and maintenance. He no longer worries about being lonely – he has friends and lots of things to do. He has peace about his health, his security and his supports.

*Tour Birkdale Place and learn about the many benefits of retirement living!*

# First Bioflex Medical Laser Clinic in Milton

"What can you do if you've tried every conceivable way to relieve pain? You've been treated by anti-inflammatory drugs, cortisone, painkillers, physiotherapy, massage and finally surgery. Yet the pain continues unabated. A technique, known as "Low Intensity Laser Therapy" (LILT) could be the answer." W. Gifford-Jones, M.D.

The space age is here! The laser Leonard McCoy used on Star Trek has evolved, and brought amazing results.

### What is Laser Therapy?

Low level light therapy (LILT) is a non invasive, pain free, light-based therapy that uses red and infrared light to target inflamed, injured, and diseased tissues. Photons of light stimulate ATP production, thereby accelerating the healing process. Compared to traditional treatments. Patients recover from musculoskeletal and peripheral nerve injuries with less scar tissue, accelerated cell regeneration and improved function.

### BENEFITS OF LASER THERAPY FOR PATIENTS

- non-surgical pain relief
- non-invasive and non-toxic
- eliminates pain
- accelerates healing
- reduces inflammation
- eligible for full or partial coverage by extended insurance coverage
- clinically proven
- cost effective option

### INDICATIONS FOR LILT

The treatments (done by Certified Therapist) are typically fifteen minutes to one hour in duration for any particular condition or patient. The number of treatments vary depending upon the presenting problem. Most protocols are between 8 and 15 treatments. The fee for laser treatments is charge by the minute varying cost from \$30 to \$60 for 30 minutes. We have successfully treated sciatica, rotator cuff injuries, arthritis of the cervical spine, knees, hips, hands, shin splints, Achilles tendonitis, post knee replacement, many sprains and strains. Laser therapy has brought accelerated healing and better results in every case. "Since 2006 we have over 3000 new patients for Bioflex laser therapy alone. When it comes to acute or chronic pain syndromes, especially inflammatory conditions, the Bioflex laser excels in fast pain

relief and resolution of the condition". Ben Yuen DC "After 32 years in practice, working with chronic conditions, I didn't think I would ever see a therapy so amazing. A year later and thousands of laser minutes applied,

I am still awed by the conditions have treated with success. Whether they have come to me after six months or 30 years of pain, all clients have walked away in wonder because something finally worked."

(I believe in honouring people and giving credit when it is due, I want to thank God and the investor that made this dream possible. Thank you Guy; you changed my life forever and the lives of all the people who have been able to experience laser therapy.)
