

Chevrolet begins shipping 2014 Corvette Stingray

Metroland Media

Chevrolet has started shipping the all-new 2014 Corvette Stingray Coupe from its plant in Bowling Green, KY.

Bowling Green Assembly has produced approximately 1,000 Corvette Stingrays for customer deliveries.

Most of these vehicles are expected to be delivered to dealers within the next few weeks. To expedite delivery, vehicles may be shipped out of build sequence, which is a normal part of any new vehicle launch.

The Bowling Green facility underwent a \$131-million upgrade to support production of the Corvette Stingray, including approximately \$52 million for a new body shop to manufacture the car's all-new aluminum frame in-house for the first time.

The lightweight aluminum frame is the foundation for the most powerful standard Corvette ever, with a SAE-certified 455 hp and 460 lb/ft of torque or 460 hp and 465 lb/ft with the available performance exhaust system.

It is also the most capable standard Corvette ever, with Z51-equipped models able to sprint from 0-60 mph in 3.8 seconds, run the quarter-mile in 12 seconds at 119 mph, achieve 1.03g in cornering grip and stop from 60 mph in 107 feet.

Complementing its performance capability with efficiency, the Corvette Stingray delivers the best fuel efficiency of any sports car on the market - with a fuel consumption rating of 12.2L/100km in city driving and 6.9L/100km on the highway.

No other car offers more than 455 hp and a 6.9L/100km highway rating.
