

FINE NEW BUILDING FOR BAY STREET

ABOVE is a perspective drawing by N. A. Armstrong and company, the architects, of the fine new \$200,000 building to be erected by Traymore Limited, in the space between the Northern Ontario building and the new Atlas building, on Bay street. The Bay street frontage is 114 feet and the depth 100 feet. The design is Spanish and will provide a new note in this rapidly changing area.
