INTRODUCTION

The My Favourites module allows the public to create an authenticated account through your VITA site and save or bookmark items from any VITA collections as Favourites.

The Site administrator can access certain screens and customize the Favourites module.

WHAT IS THE DIFFERENCE BETWEEN FAVOURITES AND COLLECTIONS?

Your users can add items to their "Favourites" list randomly and then can create sub-lists called "Collections" to organize their Favourites.

WHO CAN SEE FAVOURITES LISTS?

My Favourites operates as a private function only, i.e. the selections in peoples' Favourites lists are only available for private, authenticated user viewing.

MANAGING YOUR MY FAVOURITES MODULE

There are two platforms that support a) the user list views and b) the account management. You can customize some components of the account management screens.

MAKING MY FAVOURITES AVAILABLE ON YOUR SITE

The My Favourites module is optional and is activated in the Site Management screens.

Go to Site Management>Pages>My Favourites

The first option is to turn My Favourites “on” or “off”. The default is “Yes”.

CUSTOMIZING THE MODULE

Use the panels on this screen to customize all the label and language for the VITA-side components of the Favourites management, including: Navigation bar button labels, Login dialog box labels and language and the Add to Collection dialog box labels and language.

NAVIGATION BAR SETTINGS

Customize the button labels for your site at the Item level.

LOGIN DIALOG BOX

When a user clicks “Login”, they are presented with a dialog box to enter an existing username and password or to register a new account. You can customize the dialog box title, field names and labels.

The dialog box has a title bar with the text "My favourites account" and a close button (X). Below the title bar, there are two input fields: "User name:" and "Password:". Below the input fields, there is a paragraph of text: "Please login to manage your favourites. It will open in a new tab. If you don't already have an account, you can sign up here." At the bottom of the dialog box, there are three buttons: "New account", "Login", and "Close".

The configuration window is titled "Login dialog box". It contains several sections for configuring the dialog box:

- Label on Dialog:** A text field containing "My favourites account".
- User:** A text field containing "User name".
- Password:** A text field containing "Password".
- Help:** A text area containing the text: "Please login to manage your favourites. It will open in a new tab. If you don't already have an account, you can sign up here." The text area has a scroll bar on the right side.
- Sign up Button:** A text field containing "New account".
- Login Button:** A text field containing "Login".
- Close Button:** A text field containing "Close".

“ADD TO MY FAVOURITES” DIALOG BOX

When a user clicks “Add to my favourites,” a dialog box appears where they can add their own title, notes, tags and preselect a Collection to sort the new addition. You can customize the fields on that dialog box.

The screenshot shows a dialog box titled "Add to my favourites" with a close button (X) in the top right corner. The dialog box contains the following fields and options:

- My title:** A text input field containing "Canadian Quaker Histo".
- My notes:** A large empty text area.
- My tags:** A large empty text area.
- My collections:** A list of two radio button options:
 - Testing favorites
 - All things Red
- Original title:** A label with the text "Canadian Quaker History Journal" below it.

At the bottom right of the dialog box, there are two buttons: "Add" and "Close".

Once the user is “inside” the Favourites space, they are in a non-VITA environment, so there is no option for customizing the screens there nor is there a French version at this time. This will change when we do the next upgrade. In the meantime, we expect the language there is generic enough to suit your needs.
