There's only one choice for versatile library software!

Finding software that meets your immediate library automation needs but is also versatile enough for other text management/information retrieval applications isn't really hard. *Just reach for STAR.*®

Up and running, fast. STAR/Libraries is a ready-to-use integrated library application... with classic STAR facilities for importing MARC and non-MARC data, dynamic input validation, flexible authority controls, hundreds of report formatting options, and easy export functionality.

Powerful retrieval with assisted searching.

Staff and users alike benefit from the power of STAR's search engine in combination with graphical user interface options that make searching easy and efficient: **STAR/Client** for Windows and **STAR/Web** for all browsers.

With **STAR/Web**, you can offer fully interactive retrieval with your databases — on the Internet and on in-house networks.

And there's much more! When your library or other units in your organization need to manage other information collections and processes, reach for STAR again: for cradle-to-grave records management of paper and electronic files...special collection and archives databases...integrated solutions for full-text and images...effective access to collections of Web pages...thesaurus development and maintenance... You get the idea.

If you're stuck in a maze of software choices, call us at (800) 366-1390. We'll be glad to show you the right way out.
