

get HELP

User Power, Baby!

Horizon Information Portal 3.0 is loaded with groovy, new and improved features that will wow your users. **Cool!**

Check out some of the top features:

User Self-registration - allows users to receive temporary access to some library resources immediately and streamlines the official registration process.

Advance Booking - allows users to reserve certain items in advance to

pre-arrange a time when the book or item will definitely be available.

Outta sight!

Search Deduping - provides the ability to perform a search against multiple library catalogs resulting in a richer result set for the user.

OpenURL Support - adds OpenURL source support so that Horizon Information Portal can work with OpenURL link resolvers to enable users' easy access to full text of electronic articles. **Boss!**

ADA Support - achieved "W3C Conformance Level A" compliance for ADA support which means that all Priority 1 checkpoints are satisfied.

Usability Enhancements - includes support for emailing records in a vertical bar-delineated format and the ability to include item specific information in My List and My Account. **Far-out!**

Cruise by the Dynix Booth (#605) for a demo from one of our knowledgeable sales staff.
