Building capacity for leadership, advocacy and collaboration

*The Ontario Library Boards' Association's special conference within the conference introduces a brave new look at board leadership in the 21st Century.*

OLBA's vision is to create a primary resource for all library boards in Ontario to expand knowledge and understanding of governance role and responsibilities, and to strengthen capacity as community development leaders.

To strengthen the leadership potential of library boards as a collective force, we are

- building a sustainable leadership development program that is responsive to common issues and priorities that affect public library governance and service; and

- sourcing and organizing existing best practices, information materials, educational programs and planning forums, as tools and opportunities integral to community leadership.

Leadership by Design is an all-encompassing board development program that is accessible, affordable and absolutely relevant to the needs of library boards and CEOs wherever they live and work in Ontario.
