# JOURNAL BACKFILES

Available from Wiley-Blackwell

**G**ain unified, desktop access to 14.5 million pages of journal content published by Wiley-Blackwell. Covering a range of tightly-defined subject disciplines, your library can increase holdings, fill gaps, and provide users with efficient access to historical material dating back to Volume 1, Issue 1. Unlike the originals, online backfiles are fully searchable and live-linked to other web content, take up no space, and won't crumble in your hands.
