

recommended new model for CLA: a federated association **of** associations. The recommended governance of this proposed federation is the provincial/territorial multi-sector library associations and the national sector associations.

CLA Executive convened a meeting of national associations, national sector associations, and provincial/territorial multi-sector associations, including OLA, (a Stakeholder group) on January 31, 2015 to determine if there is interest in such an approach. The discussion was wide-ranging and, in the end there was general agreement that an agile and focused national voice for libraries and issues affecting libraries in Canada is critical.

A smaller working group was formed to further detail membership, governance, and financial features with an aim to bring recommendations for a revised proposal back to the Stakeholder Group for discussion in June 2015. Once the Stakeholder Group has agreed upon the composition of the revised proposal, then the revised proposal will be drafted and issued to the library associations' memberships for comment and feedback.
