The disentembing of Assyrian sculptures and the deciphering of Assyrian and Egyptian inscriptions have opened new fields of investigation in almost every department of know-ledge. Among the branches of science which have shared in these discoveries, that of music has been benefitted largely. The accounts of ancient musical instruments were vague, and our ideas especially of Hebrew music were confused, till recently sculptures and paintings have been brought to light which delineate the ancient musical instruments of the early Oriental nations, and in some cases veritable specimens have been disentombed. Such, for example, is an Egyptian harp found in Thebes, with its strings yet perfect enough to vibrate again, after a siience of 3000 years, The most recent investigations prove that the parent of all known musical science was and the Egyptians, and indeed all Eastern nations derived their knowledge of music. The unveiled monuments show that in the time of Sennacherib music was a highly culti-

vated art, and must have existed through generations. This polished nation used a harp of trel songs or was borne in the dance. The lyre of tortoise shell, the double pipe, the trumpet, drum, and bell were common. Even twenty one strings, which accompanied minsof the bagpipe representations have been discovered, though none of stringed instruments, like the violin, played with a bow. In all delineations of social or worshiping assemblies, musical instruments very like our

Stephens must have been falsely informed as to the purpose and policy of the Senators, as I know their grand object is Ireland, but propose taking the only practical road to it, that the circumstances of the times and the events of the last few months leave available. In presenting the AUTOMATIC ORGAN, We boldly announce the greatest triumph in musical instruments of the age. During the past half century, the French and Germans have manufactured reed instruments with double bellows, and two pedans for the feet to operate, but the want of the reversed or Ex-HAUSTED BELLOWS, (which is the only bellows used in our instruments,) made it impossible for them to produce the mellow, rich and musical tone for which our instruments are

Another objection to this method of blowing was, that both feet being occupied, no opportunity was offered for the management of the swell. Within the past two years, instruments constructed on this European plan of "double blowers," have been manufactured in this country, and to counteract this difficulty (wan t of a swell) a lever has been projected from the centre of the instrument, to act upon the swel l, AND OPERATED BY THE ENEE. The inconvenience and contortion necessary to effect this object, are disagreeable enough to a gentleman, but to a lady the use of such an appendage is nearly

Our AUTOMATIC device obviates this difficulty ntirely, the simple act of blowing with more or less force giving the desired increase or decrease in the volume of the tone.

FENIAN EXPOSE.

Mr. J. J. Geary; of the Roberts faction of Fenians, has written a letter in the New York News, admitting that the Senate party proposed an invasion of Canada, and complaining that the Fenian Brotherhood in America have been fooled by Stephens and his fellow con-

substance of that letter is, that Mr. Stephens Upon reflection, it appears to me that Mr.

It may be asked why I doubt them. My answer is this, that they have been fooling us in Ireland for the last seven years; consequently, till they show some practical proof of their earnestness, I cannot believe in them. I according to the learnestness, I cannot believe in them. I according to the learnestness, I cannot believe in them.
