THE NEW

Queen of Sewing Machines HAS CREATED THE GREATEST sonsation in the city. Hundreds have been to see it, and all are charmed with its performance. No fault can be pointed out in its construction. It is as noiseless as the most noiseless, and so simple that A CHILD CAN DO BEAUTIFUL WORK

The sale of this Machine is entirely unprecedented, and a decided success has attended its introduction. It will do fine work hetter than any machine yet made, and can be changed to do coarse work in a second, having the straight needle with a perpen-

dicular action, it has many advantages over the crooked or curyed needle machines. IT DOES ITS WORK EASILY AND SECURELY. The Shuttle is so constructed that the thread draws from it with much more precision than for-merly, and will not vary its tension, whether going fast or slow, and makes the stitch easier in heavy cloth than can be done by any other machine.

GREAT IMPROVEMENTS IN Singer's Manufacturing Machines The vibrating foot presser attached to them are a decided improvement, enabling the operator to stitch patent or enamelled leather, without oiling, in order to facilitate the operation of feeding it: The vibrating presser (which is used in all kinds of fancy stitching) permits any curve to be turned while the machine is in motion. It is a great adantage to the operator in QUILTING, in running up straight seams; and many other advantages, which only can be understood and appreciated when Great Reduction in our Prices
