WONDERFUL OPTICAL DELUSIONS.

Professor Pepper's new optical lectures at the London Polytechnic Institution are well calculated to puzzle the curious and create a large amount of wonderment. The lectures are entitled "Half Hours with Sir David Cowdor."

The most surprising and wonder-creating features of Professor Pepper's new lectures are what he has named the "Modern Delphic Oracle" and "The Fairy Casket." In introducing the former, the professor calls upon the audience to call to mind ancient Greece. The curtain rises, and the interior of a Grecian temple is discl sed. Drapery in the background is plished one side, and a figure, classically co-tumed, and reading intently a scroll which he holds in one hand, advances. The professor explains that the figure must be supposed to represent a noble Athenian, erudite and highly gifted. Through an acquaintance-ship which he had formed with one of the priests of Isis, the learned individual gets possession of a sacred scroll, which informs him that, by means of certain charms and incantations, he can hold converse with the dead. He proceeds to do so at once; and, after some formalities, he calls upon Socrates. Slowly the curtain, through which the Athenian before appeared, is drawn aside, and a head apparently floating in the air, is disclosed. There seems to be no mistake about the head being human. It is, apparently, Socrates, and seemingly "all alive."

Gradually the eyes opened and looked about most naturally, and in obedience to the demand of the Athenian, the voice of Socrates is heard pronouncing his own opinion of the decision of his judges.

The "Fairy Casket" is equally surprising. It consists of a strange table some four feet high, with four legs, which are opened to the inspection of all.

On this table is deposited a large glass box, of nearly the same size as the table. The whole is covered with drapery, when it is brought in front of the stage, close to the foot-lights. The closest inspection is invited. On the covering being removed the table and glass box, as above described, appear. The glass box seems to contain black velvet and charcoal. The professor opens the box, and fills it still further with what appears to be charcoal. He then orders his assistant to shut down the glass lid and cover the box. In a few minutes the box is uncovered, and it appears to be filled with white satin instead of charcoal. A white satin cushion is taken out of the box, and after it a real live fairy is handed from its depths, nimbly extricates herself, and bows her acknowledgments of the greetings with which she is received.

The box is again covered and uncovered. The result is, that the black velvet and charcoal again appear in the interior. The contents of the box are again produced. They consist of a large black cushion and a most interesting looking little negro, who, after jumping out of the box, throws himself in a kneeling attitude, and appeals to the audience, "Am I not a man and a brother?" These are the two principal illusions which have been, we understand, drawing such vast numbers to the Polytechnic ever since their production.

"Can you do all sorts of castings here?" said a solemn looking chap at the Iron Works the other day. "Yes," said Frank, preparing to take his order; "all sorts." "Well, then," returned the solemn inquirer,—"I would like to have you cast a shadow." He was cast out.

KNOW HIM BY THESE PRESENTS.—If a tall, thin-featured Alabamian, named Conn, who represents himself as a distressed "typo," calls upon the hands employed by any of our contemporaries, and attempts to contract debts on any heart-rending statements, they will confer a favor by intimating that his presence is desired in a printing office in this city, where a few trifling obligations remain unsettled. We are inclined to believe he is the same who victimized a few of the craft at Sarnia, some weeks since. Hand him round.—*London Free Press.*

BAILED OUT.—The necessary bonds were executed yesterday before the police magistrate for the liberation on bail of Patrol Sergeant Mack, of the city police force, now confined in the Galt jail, on a charge of complicity with those concerned in the Galt Bank robbery. Mr. Justice Wilson made an order that bail should be taken for, we understand, $2,000, himself in $1,000 and two sureties in $500 each. Mr. John Read and Mr. L. G. Bolster, consequently, became his sureties, and the bail bonds were yesterday sent to Galt. Mack will doubtless return to Toronto to-day.—*Leader.*

The Aylmer *Times* says:—A new Volunteer Company is being formed in this place. A list is in the course of signature, and we are happy to say, nearly filled up. A meeting was held last night, at which we noticed one representative, A. Wright, Esq., M.P.P., who seems to take a lively interest in the matter. Peter Aylen, Esq., Richard S. Lawler and Robert S. Lawler; both the latter gentlemen are graduates of the Military School at Montreal. Another meeting will be held on Friday evening next, in the Market Hall, on which occasion speeches will be delivered by Mr. Wright and others. We have no doubt, from present indications, that the list of membership for the company will be complete, and that the officers will then be elected.

THE REGULARS.—A pleasing feature in connection with the present excitement, is the deep interest manifested in the volunteer movement, by the officers of the regular force garrisoned in London. Colonel Hawley, 60th Rifles, has been especially assiduous in his efforts to promote the efficiency of our citizen-soldiers, and has devoted valuable time to this end. In this connection, we may say that we may consider London highly favored, these troublous times, in having as her defenders a corps of such efficient and undoubtedly loyal men as compose the rank and file of the 60th Regiment. Since coming to our city, they have conducted themselves as becomes soldiers of Queen Victoria, and should the Fenians show their unholy forms on our soil, we doubt not the men composing the 60th will conduct themselves with equal honor on the battle field.—*London Paper.*

GOVERNMENT IMMIGRATION OFFICE,
QUEBEC, 25th January, 1866.

SIR,—

The Honorable the Minister of Agriculture and Immigration, having authorized the publication, by this Department, of an occasional paper, to be called the "CANADA IMMIGRATION GAZETTE," which will be devoted exclusively to the encouragement of Immigration, and to the diffusion of accurate and useful information concerning Canada abroad, I beg leave to bring under your notice the advantages this sheet will offer as an advertising medium to land owners, and others having properties for sale or lease. As information of this kind is eagerly sought for, and much valued by every intelligent emigrant, means will thus be afforded of placing the intending purchaser or lessee in Great Britain in direct communication with the property-holder here.

The Honorable the Minister of Agriculture and Immigration has also authorised the opening of an Information Office in Liverpool, under the management of Mr. Wm. Dixon, a gentleman well acquainted with this and the mother country, who will be specially charged with the distribution of this paper throughout the United Kingdom, and in bringing the same prominently under the notice of the emigrant.

The first number will appear in the course of next month, the second in April, bringing down the information to the latest period, to be followed bi-monthly or quarterly, as may be required.

As the space it is intended to allot for advertising purposes will be limited, and in view of the large circulation the sheet will obtain, (for it will be distributed gratuitously,) the prices for all advertisements cannot be much lower than the following:—

For each advertisement, not exceeding ten lines, $2 the insertion; and 50 cents for every extra line.

For a space of 22 lines, to stand for a twelve month, $60.

In all cases, advertisements must be paid for in advance.

An early transmission is recommended.

The undersigned will gladly receive communications of a practical character for publication, bearing on the subject of Immigration, such as letters from actual settlers, showing their progress in the country, and pointing out the peculiar advantages of their district in particular, &c. It is desirable that they should be written as concisely as possible, and be free from anything like exaggeration.

I am, Sir,
Your obedient servant,
A. C. BUCHANAN,
Chief Agent.

DARLEY'S
Arabian Heave Remedy
AND CONDITION MEDICINE

IS POSITIVELY SUPERIOR TO ANY OR all other preparations for the Cure of *Heaves, Coughs, Thick* and *Broken Wind*, and all diseases which affect the *Wind of Horses*; also, as a *Condition Medicine*, surpassing every thing of the kind; is easy to give, sure to cure, and safe in all cases and at all times, and does not prevent the horse from being worked while using it.

It cleanses the breathing apparatus, by removing from the air-cells the coagulable lymph, or that secretion which in Heaves clogs them, causing a difficulty in breathing, and by its action on the diseased part, causing the mucous membrane to resume its natural dimensions, thus equalizing the circulation of the blood, and restoring the distended vessels to their natural size; by its use the horse's appetite is improved, all derangements of the digestive organs corrected, softening the skin, and giving to the coat a sleek and shining appearance.

PIANO FORTES

DRIGGS' NEW PATENT.

ARE THE ONLY INSTRUMENTS constructed on a truly Scientific Principle. They have the greatest strength, and will remain longer in Tune than any other Piano. The construction is simple, substantial, all the various Scales in the body of the instrument is dispensed with; the sound boards are merely two solid planks of thin wood, like the front and back of a violin; the strings are attached to a strong Iron frame, which is separated and entirely independent of the case, thereby dispensing with the old harp form of Piano, by substituting straight Timbers, preserving at the same time the Overstrung Bass, of which Mr. Driggs is the Inventor. By these improvements we gain much more vibratory power, at the same time preserving all its purity and richness of tone.

They have received the highest testimonials from the Press and all the principal artists in the country, among which are:

Harry Sanderson,	*L. N. Gottschalk,*
Max Maretzek,	*S. Thalberg,*
Theodore Thomas,	*Wm. Mason,*
Herman Wellenhaupt,	*J. Hanlk,*
Francis E. Brown,	*M. Strakosch,*
Wm. Henry Fry,	*Chas. Fradel,*

MR. SIGISMUND THALBERG, the great pianist says:—I have examined your new Piano-Forte, and I cordially approve of its system of construction. It is a real, by which great increase of vibratory power is obtained, being very simple and perfectly philosophical. The tone is round and full; it has great capacity for sustaining the sound for singing, and its volume of tone or power I have never heard excelled in depth, purity, and sympathetic sweetness.

WM. HENRY FRY, late musical critic of the N. Y. *Tribune* says:—I have examined your newly invented Piano-Fortes. They merit all the praise given to them by Messrs. Thalberg Gottschalk, Strackosch, Mason and others
