The Automatic Organ. In presenting the AUTOMATIC ORGAN, we past half century, the French and Germans have manufactured reed instruments with double bellows, and two peda'ls for the feet to g operate, but the want of the reversed or Ex-HAUSTED BELLOWS, (which is the only bellows used in our instruments,) made it impossible for them to produce the mellow, rich and

musical tone for which our instruments are Another objection to this method of blowing was, that both feet being occupied, no opportunity was offered for the management of the swell. Within the past two years, instruments constructed on this European plan of "double blowers," have been manufactured in this of a swell) a lever has been projected from the centre of the instrument, to act upon the swell AND OPERATED BY THE KNEE. The inconvenience and contortion necessary to effect this object, are disagreeable enough to a gentleman, but to a lady the use of such an appendage is nearly

Our AUTOMATIC device obviates this difficulty entirely, the simple act of blowing with more or less force giving the desired increase or decrease in the volume of the tone. The Melodeon and School Organ.
