PIANO FORTES

DRIGGS' NEW PATENT. RE THE ONLY INSTRUMENTS A constructed on a truly Scientific Principle. They have greater strength, and will remain longer in Tune than any other Piano The construction is simple and natural, all the extraneous lumber in the body of the instrument is despensed with; the sound boards are merely two arched planks of thin wood, like the front and back of a violin ; the strings are attached to a strong Iron frame, which is separated and entirely independent of the case, thereby dispensing with the old harp form of stringing by substituting straight bridges, preserving at the same time the Over Strung Bass, of which Mr. Driggs is the Inventor. By these improvements we gain much more vibratory power, at the same time preserving all its

purity and richness of tone. They have received the highest testimonial from the Press, and all the principal artists in the country, among which are : Harry Sanderson, L. M. Gottschalk. Max Maretsek, Theodore Etsheld, le 'm, .Beson, Herman Wollenhaupt, .f. Earth, Francis H. Brown, .M. Strackouch,

From the N. Y.
