OTTAWA, JUNE 20, 1866.

The discussion on the resolution introduced nto the Assembly on Monday by the ber for North Simcoe on the subject of grants of land to actual settlers took a wide range, embracing the whole policy of t Crown Land Department. The feeling in fa vor of a more liberal policy appeared to have been general on both sides of the House The decision however was not of practical value, as the amendment of the member for Compton which prevailed in the division shut off all action till after the adoption of the Confederate and Local constitutions. The wisdom of this determination can hardly be called in question, for the inauguration of new policy on the all important subject of land administration in the midst of the downfall of our present Governmental machinery could hardly bring about any material benefits to the country, since the Crown domain is about to pass under the control of the Local Legislatures who will doubtless frame their systems in accordance with the peculiar views prevailing in the separate Provinces.

Though much of this country has been denuded of its valuable timber, it is the opinion of those best informed, that a larger area remains untouched; happily for the interests of the county the pine exists on lands for the most part unfit for settlement. It but needs a careful discrimination between pine lands exclusively, and lands fit for set tlement, to place it in the power of the Government to conserve this valuable source of national wealth.
