A NILLUSTRATED CATALOGUE CONTAINof the most eminent musicians, as to the superior excellence of our instruments-will be sent free to The Automatic Organ. In presenting the AUTOMATIC ORGAN, we boldly announce the greatest triumph in musical instruments of the age. During the past half century, the French and Germans have manufactured reed in-

body sendered unnealthy by the heavy and greasy secretions of the winter months. This safe, though in our instruments,) made it impossible for them. in our instruments,) made it impossible for them to our instruments are celebrated. Another objection to this method of blowing was, that both feet being occupied, no opportunity was offered for the management of the swell. Within the past two years, instruments constructed on this European plan of "double blowers," have been manufactured in this country, and to counteract this difficulty (want of a swell) a lever has been prejected from the centre of the instrument, to act upon upon the swell, AND OPERATED BY THE KNEE. The inconvenience and contortion necessary to effect this object are disagreeable enough to a gentleman, but to a lady the use of such an appendage is near-

> Out AUTOMATIC device obviates this difficulty entirely, the simple act of blowing with more or less force giving the desired increase or decrease in the The Melodeon and School Organ. For beventeen years the superior excellence of our Melodeons has not been questioned, and for two years past the enormous demand has made it im possible for us to meet our orders promptly. With our increased facilities, we feel warranted in assuring our patrons that their orders will be promptly met, and solicit a continuance of their patronage.

> Cantion to Purchasers. All of our instruments have upon the name-board, in full, "GEO. A. PRINCE & CO." When a dealer represents any other instrument as "the same as ours," it is usually a mere attempt to sell an inferior instrument on which he can make a large profit.
